

This Month in Haematologica

1409-1414 December 2004

Editorials, Comments & Views1415-1419 Infectious toxicity using alemtuzumab
Annamaria Nosari

1419-1420 Alemtuzumab for treatment of lymphoproliferative disorders

Research Papers*Hematopoietic Stem Cells*1421-1427 Mesenchymal stem cells are present in peripheral blood and can engraft after allogeneic hematopoietic stem cell transplantation
*Eva María Villaron, Julia Almeida, Natalia López-Holgado, Miguel Alcoceba, Luis Ignacio Sánchez-Abarca, Fermin Martin Sanchez-Guijo, Mercedes Alberca, Jose Antonio Pérez-Simon, Jesus Fernando San Miguel, María Consuelo Del Cañizo**Hematopoietic Stem Cells*1428-1433 Proteasome proteolytic activity in hematopoietic cells from patients with chronic myeloid leukemia and multiple myeloma
*Laura Magill, John Lynas, Trenn C.M. Morris, Brian Walker, Alexandra E. Irvine**Erythropoiesis*1434-1440 Analysis of remnant reticulocyte mRNA reveals new genes and antisense transcripts expressed in the human erythroid lineage
*Béatrice Bonafoux, Mireille Lejeune, David Piquemal, Ronan Quéré, Aurélie Baudet, Léa Assaf, Jacques Marti, Patricia Aguilar-Martinez, Thérèse Commes**Iron Metabolism*1441-1445 Hepatic and extrahepatic expression of the new iron regulatory protein hemojuvelin
*Alejandra Rodriguez Martinez, Onni Niemelä, Seppo Parkkila**Myelodysplastic Syndromes*1446-1453 Hypochromic red blood cells in low-risk myelodysplastic syndromes: effects of treatment with hematopoietic growth factors
*Therese Ljung, Rune Bäck, Eva Hellström-Lindberg**Chronic Myeloproliferative Disorders*1454-1458 Bone marrow angiogenesis and its clinical correlates in myelofibrosis with myeloid metaplasia
*Brijesh Arora, Ching-Liang Ho, James D. Hoyer, Ruben A. Mesa, Ayalew Tefferi**Acute Lymphoblastic Leukemias*1459-1467 Common γ chain-signaling cytokines promote proliferation of T-cell acute lymphoblastic leukemia
*Joao T. Barata, Thomas D. Keenan, Ana Silva, Lee M. Nadler, Vassiliki A. Boussiotis, Angelo A. Cardoso**Chronic Lymphoproliferative Disorders*1468-1475 Clinical significance of soluble p53 protein in B-chronic lymphocytic leukemia
*Maria Ilaria Del Principe, Giovanni Del Poeta, Adriano Venditti, Francesco Buccisano, Luca Maurillo, Rita Marini, Maria Christina Cox, Paola Panetta, Giovanna Suppo, Massimo Degan, Antonio Bruno, Valter Gattei, Sergio Amadori**Malignant Lymphomas*1476-1483 Effect of alemtuzumab on neoplastic B cells
*Josée Golay, Massimiliano Mangani, Alessandro Rambaldi, Martino Introna**Malignant Lymphomas*1484-1491 Phase II study of fludarabine and α -interferon in patients with low-grade non-Hodgkin's lymphoma
*Gloria J. Morris, Michael M. Millenson, Kristin Padavic-Shaller, Hao Wang, Andre Rogatko, James Clyde, Robert L. Boyd, Gwen Yeslow, Theresa Halbberr, Russell J Schilder, Mitchell R. Smith**Pediatric Malignancies*1492-1497 NQO1 C609T polymorphism in distinct entities of pediatric hematologic neoplasms
*Thorben Kracht, Martin Schrappe, Sabine Strehl, Alfred Reiter, Holger-Andreas Elsner, Jan Trka, Gunnar Cario, Susanne Viehmann, Jochen Harbott, Arndt Borkhardt, Markus Metzler, Thorsten Langer, Reinold Repp, Rolf Marschalek, Karl Welte, Oskar A. Haas, Martin Stanulla**Disorders of Hemostasis*1498-1503 Molecular characterization of hemophilia B in North Indian families: identification of novel and recurrent molecular events in the factor IX gene
*Anubha Mahajan, Sreenivas Chavali, Madhulika Kabra, Madhumita Roy Chowdhury, Dwaipayyan Bharadwaj**Disorders of Hemostasis*1504-1509 Characterization of mild coagulation factor VII deficiency: activity and clearance of the Arg315Trp and Arg315Lys variants in the Cys310-Cys329 loop (c170s)
*Christian Furlan Freguia, Raffaella Toso, Eleanor S. Pollak, Valder R. Arruda, Mirko Pinotti, Francesco Bernardi**Thrombosis*1510-1516 Polymorphisms in factor II and factor VII genes modulate oral anticoagulation with warfarin
*Rosa Lucia D'Ambrosio, Giovanna D'Andrea, Filomena Cappucci, Massimo Chetta, Pasquale Di Perna, Vincenzo Brancaccio, Elvira Grandone, Maurizio Margaglione**Stem Cell Transplantation*1517-1524 *In vivo* induction of T-cell hyporesponsiveness and alteration of immunological cells of bone marrow grafts using granulocyte colony-stimulating factor
Huang Xiao Jun, Chang Ying Jun, Zhao Xiang Yu

Letters to the Editor

Chronic Myeloproliferative Disorders
 1525-1527 Altered apoptosis and cell cycling of mast cells in bone marrow lesions of patients with systemic mastocytosis
Stephan E. Baldus, Thomas K. Zirbes, Juergen Thiele, Sabine A. Eming, Beate M. Henz, Karin Hartmann

Malignant Lymphomas
 1527-1528 Primary non-Hodgkin's lymphoma of the breast: a report of 11 cases
Maria Giuseppina Cabras, Maurizio Amichetti, Michele Nagliati, Paola Orrù, Angela Maria Mamusa, Emanuele Angelucci

Platelets
 1529-1530 A novel Ser123Pro substitution in the MIDAS domain of integrin α 3 associated with a variant Glanzmann's thrombasthenia in an Indian patient
Sona Nair, Kanjaksha Ghosh, Shrimati Shetty, Dipika Mohanty

Stem Cell Transplantation
 1530-1532 Basal CD34⁺ cell count predicts peripheral blood progenitor cell mobilization and collection in healthy donors after administration of granulocyte colony-stimulating factor
Javier de la Rubia, José I Lorenzo, Marta Torradadella, Pedro Marín, Andrés Insunza, Miguel A Sanz

Stem Cell Transplantation
 1532-1534 Successful peripheral blood stem cell harvesting with granulocyte colony-stimulating factor alone after previous mobilization failure
François Lefrère, Vincent Lévy, Jaffar Makke, Françoise Audat, Marina Cavazzana-Calvo, Jean-Michel Micléa

Stem Cell Transplantation
 1534-1536 A reduced intensity conditioning regimen for allografting following autografting is feasible and has strong anti-myeloma activity
Angelo Michele Carella, Germana Beltrami, Maria T. Corsetti, Potito Scalzulli, Angelo Michele Carella Jr, Pellegrino Musto

Continuing Medical Education

1537 Myelodysplastic syndromes: treatment with hematopoietic growth factors and red cell parameters

1538 Myelofibrosis with myeloid metaplasia: clinical correlations of bone marrow angiogenesis

1539 Alemtuzumab: biological evidences for clinical application

1540 Oral anticoagulation and genetic polymorphisms
