Volume 100, Issue 10: October 2015

Cover Figure
Artistic representation of the interleukin-7 receptor complex in the plasma membrane of a cell. (Image created by www.somersault1824.com)

Editorials
1237 A novel mouse model provides insights into the neutropenia associated with the ribosomopathy Shwachman-Diamond syndrome
Kim De Keersmaeker

Review Article
1240 JAK kinase targeting in hematologic malignancies: a sinuous pathway from identification of genetic alterations towards clinical indications
Lorraine Springuel, et al.

Guideline Article
1254 European Myeloma Network Guidelines for the Management of Multiple Myeloma-related Complications
Evangelos Terpos, et al.

Articles
Hematopoiesis
1267 Therapeutic effect of androgen therapy in a mouse model of aplastic anemia produced by short telomeres
Christian Bär, et al.

Red Cell Biology & Its Disorders
1275 Genetic variants and cell-free hemoglobin processing in sickle cell nephropathy
Santosh L. Saraf, et al.

Bone Marrow Failure
1285 Deficiency of the ribosome biogenesis gene Sbds in hematopoietic stem and progenitor cells causes neutropenia in mice by attenuating lineage progression in myelocytes
Noemi A. Zambetti, et al.

Acute Myeloid Leukemia
1294 Panobinostat as part of induction and maintenance for elderly patients with newly diagnosed acute myeloid leukemia: phase Ib/II panobidara study
Enrique M. Ocio, et al.

Acute Lymphoblastic Leukemia
1301 Targeted sequencing identifies associations between IL7R-JAK mutations and epigenetic modulators in T-cell acute lymphoblastic leukemia
Carmen Vicente, et al.
1311  CD200/BTLA deletions in pediatric precursor B-cell acute lymphoblastic leukemia treated according to the EORTC-CLG 58951 protocol  
Farzaneh Ghazavi, et al.

Hodgkin Lymphoma
1320  Potential role of hypoxia in early stages of Hodgkin lymphoma pathogenesis  
Frederik Wein, et al.

Plasma Cell Disorders
1327  Cytogenetics and long-term survival of patients with refractory or relapsed and refractory multiple myeloma treated with pomalidomide and low-dose dexamethasone  
Melitos A. Dimopoulos, et al.

1334  Impact of prior treatment and depth of response on survival in MM-003, a randomized phase 3 study comparing pomalidomide plus low-dose dexamethasone versus high-dose dexamethasone in relapsed/refractory multiple myeloma  
Jesus F. San Miguel, et al.

1340  Large registry analysis to accurately define second malignancy rates and risks in a well-characterized cohort of 744 consecutive multiple myeloma patients followed-up for 25 years  
Monika Engelhardt, et al.

1350  The novel β2-selective proteasome inhibitor LU-102 synergizes with bortezomib and carfilzomib to overcome proteasome inhibitor resistance of myeloma cells  
Marianne Kraus, et al.

Stem Cell Transplantation
1327  Better allele-level matching improves transplant-related mortality after double cord blood transplantation  
Berül Oran, et al.

Letters to the Editor
Letters are available online only at www.haematologica.org/content/100/10.toc

e383  Hydroxyurea treatment does not increase blood viscosity and improves red blood cell rheology in sickle cell anemia  
Nathalie Lemonne, et al.  
http://www.haematologica.org/content/100/10/e383

e387  Impact of red cell distribution width on future risk of cancer and all-cause mortality among cancer patients – the Tromsø Study  
Trygve S. Ellingsen, et al.  
http://www.haematologica.org/content/100/10/e387

e390  Quantitative microfluidic fluorescence microscopy to study vaso-occlusion in sickle cell disease  
Mariza A. Jimenez, et al.  
http://www.haematologica.org/content/100/10/e390

e394  Anti-KEL sera prevents alloimmunization to transfused KEL RBCs in a murine model  
Sean R. Stowell, et al.  
http://www.haematologica.org/content/100/10/e394

e398  GATA2 and secondary mutations in familial myelodysplastic syndromes and pediatric myeloid malignancies  
Xinan Wang, et al.  
http://www.haematologica.org/content/100/10/e398

e402  Dysregulation of shelterin factors coupled with telomere shortening in Philadelphia chromosome negative myeloproliferative neoplasms  
Jenny Dahlström, et al.  
http://www.haematologica.org/content/100/10/e402

e406  Increased pressure alters plasma membrane dynamics and renders acute myeloid leukemia cells resistant to daunorubicin  
Victor Sanjit Nirmalanandhan, et al.  
http://www.haematologica.org/content/100/10/e406
Empiric definition of eligibility criteria for clinical trials in relapsed/refractory acute myeloid leukemia: analysis of 1,892 patients from HOVON/SAKK and SWOG
Roland B. Walter, et al.
http://www.haematologica.org/content/100/10/e409

NPM1 mutation is associated with leukemia cutis in acute myeloid leukemia with monocytic features
Marlise R. Luskin, et al.
http://www.haematologica.org/content/100/10/e412

Primary diffuse large B-cell lymphoma associated with clonally-related monoclonal B lymphocytosis indicates a common precursor cell
Agnieszka Malecka, et al.
http://www.haematologica.org/content/100/10/e415

LB-ARHGDIB-1R as a novel minor histocompatibility antigen for therapeutic application
Margot J. Pont, et al.
http://www.haematologica.org/content/100/10/e419

Tandem autologous-allogeneic stem cell transplantation as a feasible and effective procedure in high-risk lymphoma patients
Roberto Crocchiolo, et al.
http://www.haematologica.org/content/100/10/e423

Transplantation of Macaca cynomolgus iPS-derived hematopoietic cells in NSG immunodeficient mice
Soumeya Abed, et al.
http://www.haematologica.org/content/100/10/e428

Comments
Comments are available online only at www.haematologica.org/content/100/10.toc

Comment on “Acute lymphoblastic leukemia and adiponcosis” by M. Bifilco and AM Malfitano
Saskia M.F. Pluijm, et al.
