Volume 100, Issue 11: November 2015

Cover Figure
Artistic representation of the hematopoietic stem cell niche - accompanying the 'Leaders in Hematology' review article by Krause & Scadden page 1376 of this issue. (Image created by www.somersault1824.com)

Editorials
1371 TIGIT-positive circulating follicular helper T cells and sickle cell alloimmunization
France Pirenne
1373 The origin of relapse in pediatric T-cell acute lymphoblastic leukemia
Carmen Vicente and Jan Cools

Review Article
Leaders in Hematology review series
1376 A hostel for the hostile: the bone marrow niche in hematologic neoplasms
Daniela S. Krause and David T. Scadden
1388 Complement inhibitors to treat IGM-mediated autoimmune hemolysis
Diana Wouters and Sacha Zeerleder

Articles
Hematopoiesis
1396 CD14+ cells from peripheral blood positively regulate hematopoietic stem and progenitor cell survival resulting in increased erythroid yield
Esther Heideveld, et al.

Red Cell Biology & Its Disorders
1407 Complement deposition in autoimmune hemolytic anemia is a footprint for difficult-to-detect IgM autoantibodies
Elisabeth M. Meulenbroek, et al.
1415 TIGIT-positive circulating follicular helper T cells display robust B-cell help functions: potential role in sickle cell alloimmunization
Emmanuelle Godefroy, et al.

Bone Marrow Failure
1426 Comparison of long-term outcomes between children with aplastic anemia and refractory cytopenia of childhood who received immunosuppressive therapy with antithymocyte globulin and cyclosporine
Asahito Hama, et al.

Myeloproliferative Disorders
1434 Gene-expression and in vitro function of mesenchymal stromal cells are affected in juvenile myelomonocytic leukemia
Friso G.J. Calkoen, et al.
Acute Lymphoblastic Leukemia

1442  Pediatric T-cell lymphoblastic leukemia evolves into relapse by clonal selection, acquisition of mutations and promoter hypomethylation
Joachim B. Kunz, et al.

Chronic Lymphocytic Leukemia

1451  Outcome of advanced chronic lymphocytic leukemia following different first-line and relapse therapies: a meta-analysis of five prospective trials by the German CLL Study Group (GCLLSG)
Paula Cramer, et al.

Non-Hodgkin Lymphoma

1460  Toll-like receptor stimulation in splenic marginal zone lymphoma can modulate cell signaling, activation and proliferation
Eleonora Fonte, et al.

Plasma Cell Disorders

1469  Clinical profile and treatment outcome of older (>75 years) patients with systemic AL amyloidosis
Sajitha Sachchithanantham, et al.

Stem Cell Transplantation

1477  Risks and benefits of sex-mismatched hematopoietic cell transplantation differ according to conditioning strategy
Hideki Nakasone, et al.

Quality of Life

1486  Assessing patients’ anticoagulation preferences for the treatment of cancer-associated thrombosis using conjoint methodology
Simon Noble, et al.

Letters to the Editor

Letters are available online only at www.haematologica.org/content/100/11.toc

e434  Genomic patterns associated with hypoplastic compared to hyperplastic myelodysplastic syndromes
Aziz Nazha, et al.
http://www.haematologica.org/content/100/11/e434

e438  DNMT3A mutations occur early or late in patients with myeloproliferative neoplasms and mutation order influences phenotype
Jyoti Nangalia, et al.
http://www.haematologica.org/content/100/11/e438

e443  Impact of mutational status on pregnancy outcome in patients with essential thrombocytemia
Elisa Rumi, et al.
http://www.haematologica.org/content/100/11/e443

e446  Competing risk survival analysis in patients with symptomatic Waldenström macroglobulinemia: the impact of disease unrelated mortality and of rituximab-based primary therapy
Efstathios Kastritis, et al.
http://www.haematologica.org/content/100/11/e446

e450  Mutated JAK kinases and deregulated STAT activity are potential therapeutic targets in cutaneous T-cell lymphoma
Cristina Pérez et al.
http://www.haematologica.org/content/100/11/e450

e454  Characteristics and management of rash following lenalidomide and rituximab in patients with untreated indolent non-Hodgkin lymphoma
Nathan H. Fowler, et al.
http://www.haematologica.org/content/100/11/e454
e458  The G protein-coupled estrogen receptor 1 (GPER-1) contributes to the proliferation and survival of mantle cell lymphoma cells  
Martina Rudelius, et al.  
http://www.haematologica.org/content/100/11/e458

e462  Epidemiology of invasive fungal disease in lymphoproliferative disorders  
Jasmine C. Teng, et al.  
http://www.haematologica.org/content/100/11/e462

e467  Antineoplastic effects of liposomal short interfering RNA treatment targeting BLIMP1/PRDM1 in primary effusion lymphoma  
Giovanni Riva et al.  
http://www.haematologica.org/content/100/11/e467

e471  MB4-2 breakpoint in MMSET combined with del(17p) defines a subset of t(4;14) multiple myeloma with very poor prognosis  
Anne Lazareth, et al.  
http://www.haematologica.org/content/100/11/e471

e475  Use of killer cell immunoglobulin-like receptor genes as early markers of hematopoietic chimerism after double-umbilical cord blood transplantation  
Pauline Rettman, et al.  
http://www.haematologica.org/content/100/11/e475

Comments

Comments are available online only at www.haematologica.org/content/100/11.toc

e480  Comment on “Rituximab maintenance for patients with aggressive B-cell lymphoma in first remission: results of the randomized NHL13 trial”  
Theodoros P. Vassilakopoulos, et al.  
http://www.haematologica.org/content/100/11/e480

e482  Response to comment by P. Vassilakopoulos and colleagues  
Ulrich Jaeger, et al.  
http://www.haematologica.org/content/100/11/e482
