Volume 100, Issue 4: April 2015

Cover Figure
Illustration of DNA looping at the hemoglobin locus as a mechanism to reactivate fetal globin expression. Image inspired by the review article by Stefano Rivella from our new ‘Leaders in Hematology’ review series. (image created by www.somersault1824.com)

Editorials
409 JAK inhibitors and myelofibrosis, Einstein and ruxolitinib
Claire Harrison

411 Ofatumumab and its role as immunotherapy in chronic lymphocytic leukemia
Suneet Sandhu, et al.

414 Hematopoietic cell transplantation for acute leukemia: selecting donors
Mary Eapen

415 Aging and blood disorders: new perspectives, new challenges
D. Bron, et al.

Review Article  ‘Leaders in Hematology’ review series
418 β-thalassemias: paradigmatic diseases for scientific discoveries and development of innovative therapies
Stefano Rivella, et al.

Articles
Hematopoiesis
431 Hematopoiesis specific loss of Cdk2 and Cdk4 results in increased erythrocyte size and delayed platelet recovery following stress
Senthil Raja Jayapal, et al.

439 Role of the clathrin adaptor PICALM in normal hematopoiesis and polycythemia vera pathophysiology
Yuichi Ishikawa, et al.

Red Cell Biology & Its Disorders
452 A genetic score for the prediction of beta-thalassemia severity
Fabrice Danjou, et al.

Iron Metabolism & Its Disorders
458 Regulation of cell surface transferrin receptor-2 by iron-dependent cleavage and release of a soluble form
Alessia Pagani, et al.

Coagulation & Its Disorders
466 Elevated hypercoagulability markers in hemoglobin SC disease
Marina P. Colella, et al.
Myelodysplastic Syndromes

472 Multicentric study underlining the interest of adding CD5, CD7 and CD56 expression assessment to the flow cytometric Ogata score in myelodysplastic syndromes and myelodysplastic/myeloproliferative neoplasms
Valérie Bardet, et al.

Myeloproliferative Disorders

479 Efficacy, safety, and survival with ruxolitinib in patients with myelofibrosis: results of a median 3-year follow-up of COMFORT-I
Srdan Verstovsek, et al.

Acute Lymphoblastic Leukemia

489 Multifunctional human CD56<sup>+</sup>CD16<sup>-</sup> natural killer cells are the prominent subset in bone marrow of both healthy pediatric donors and leukemic patients
Helena Stabile, et al.

Chronic Lymphocytic Leukemia

499 Generation of a poor prognostic chronic lymphocytic leukemia-like disease model: PKCα subversion induces up-regulation of PKCβII expression in B lymphocytes
Rinako Nakagawa, et al.

511 Ofatumumab in poor-prognosis chronic lymphocytic leukemia: a phase IV, non-interventional, observational study from the European Research Initiative on Chronic Lymphocytic Leukemia
Carol Moreno, et al.

Non-Hodgkin Lymphoma

517 The genotype of MLH1 identifies a subgroup of follicular lymphoma patients who do not benefit from doxorubicin: FIL-FOLL study
Davide Rossi, et al.

525 Trends in incidence, treatment and survival of aggressive B-cell lymphoma in the Netherlands 1989-2010
Djamila E. Issa, et al.

534 Successful change of treatment strategy in elderly patients with primary central nervous system lymphoma by de-escalating induction and introducing temozolomide maintenance: results from a phase II study by The Nordic Lymphoma Group
Elisa J. Pulczynski, et al.

Plasma Cell Disorders

541 Activity of everolimus (RAD001) in relapsed and/or refractory multiple myeloma: a phase I study
Andreas Günther, et al.

Cell Therapy & Immunotherapy

548 HLA-G expression levels influence the tolerogenic activity of human DC-10
Giada Amodio, et al.

Stem Cell Transplantation

558 T-cell-replete haploidentical transplantation versus autologous stem cell transplantation in adult acute leukemia: a matched pair analysis
Norbert-Claude Gorin, et al.

Letters to the Editor

Letters are available online only at www.haematologica.org/content/100/4.toc

e122 Clinical and functional implications of microRNA mutations in a cohort of 935 patients with myelodysplastic syndromes and acute myeloid leukemia
Felicitas Thol, et al.
http://www.haematologica.org/content/100/4/e122
Refractory anemia with ring sideroblasts and marked thrombocytosis cases harbor mutations in \textit{SF3B1} or other spliceosome genes accompanied by JAK2/V617F and \textit{ASXL1} mutations
Sabine Jeromin, et al.
http://www.haematologica.org/content/100/4/e125

Vincristine, dexamethasone and epratuzumab for older relapsed/refractory CD22+ acute lymphoblastic leukemia patients: a phase II study
Patrice Chevallier, et al.
http://www.haematologica.org/content/100/4/e128

Towards personalized therapy in pediatric acute lymphoblastic leukemia: RAS mutations and prednisolone resistance
Ingrid M. Ariës, et al.
http://www.haematologica.org/content/100/4/e132

Hydrocortisone does not influence glucocorticoid sensitivity of acute lymphoblastic leukemia cells
Lidewij T. Warris, et al.
http://www.haematologica.org/content/100/4/e137

Ibrutinib impairs the phagocytosis of rituximab-coated leukemic cells from chronic lymphocytic leukemia patients by human macrophages
Mercedes Borge, et al.
http://www.haematologica.org/content/100/4/e140

Evidence for idiotype-directed immunosurveillance is restricted to follicular lymphoma and attributable to somatic hypermutation
Dimitrios Papaioannou, et al.
http://www.haematologica.org/content/100/4/e143

The optimized anti-CD20 monoclonal antibody ublituximab bypasses natural killer phenotypic features in Waldenström macroglobulinemia
Magali Le Garff-Tavernier, et al.
http://www.haematologica.org/content/100/4/e147

Identification of IG-clonality status as a pre-treatment predictor for mortality in patients with immunodeficiency-associated Epstein-Barr virus-related lymphoproliferative disorders
Walter J.F.M. van der Velden et al.
http://www.haematologica.org/content/100/4/e152

Contiguous follicular lymphoma and follicular lymphoma in situ harboring N-glycosylated sites
Emilie Mamessier, et al.
http://www.haematologica.org/content/100/4/e155

Selective loss of vaccine-specific memory B cells in a rhesus macaque model of chemotherapy: influence of doxorubicin on immunological memory
Hanna M. Ingelman-Sundberg, et al.
http://www.haematologica.org/content/100/4/e158
