Myelodysplastic Syndromes

643 Impaired cytotoxicity associated with defective natural killer cell differentiation in myelodysplastic syndromes
Maryam Hejazi, et al.

Acute Lymphoblastic Leukemia

653 Final report of a phase II study of imatinib mesylate with hyper-CVAD for the front-line treatment of adult patients with Philadelphia chromosome-positive acute lymphoblastic leukemia
Naval Daver, et al.

Chronic Lymphocytic Leukemia

662 Efficacy and safety of front-line therapy with fludarabine-cyclophosphamide-rituximab regimen for chronic lymphocytic leukemia outside clinical trials: the Israeli CLL Study Group experience
Yair Herishanu, et al.

Plasma Cell Disorders

670 Phase II study of the combination of panobinostat and carfilzomib in patients with relapsed/refractory multiple myeloma
Jesus G. Berdeja, et al.

677 Extended follow up of high-dose melphalan and autologous stem cell transplantation after vincristine, doxorubicin, dexamethasone induction in amyloid light chain amyloidosis of the prospective phase II HOVON-41 study by the Dutch-Belgian Co-operative Trial Group for Hematology Oncology
Bouke P.C. Hazenberg, et al.

Stem Cell Transplantation

683 The impact of graft-versus-host disease prophylaxis in reduced-intensity conditioning allogeneic stem cell transplant in acute myeloid leukemia: a study from the Acute Leukemia Working Party of the European Group for Blood and Marrow Transplantation
Marie Thérèse Rubio, et al.

690 Failure-free survival in a prospective cohort of patients with chronic graft-versus-host disease
Joanne Palmer, et al.

696 Current outcome of HLA identical sibling versus unrelated donor transplants in severe aplastic anemia: an EBMT analysis
Andrea Bacigalupo, et al.

Letters to the Editor

Letters are available online only at www.haematologica.org/content/100/5.toc

e162 Markedly perturbed hematopoiesis in acid ceramidase deficient mice
Shaalee Dworski, et al.
http://www.haematologica.org/content/100/5/e162

e166 Hb S/β-thalassemia due to Hb sickle and a novel deletion of DNase I hypersensitive sites HS3 and HS4 of the β locus control region
Ali Amid, et al.
http://www.haematologica.org/content/100/5/e166

e169 Differences in the erythropoiesis-hepcidin-iron store axis between hemoglobin H disease and β-thalassemia intermedia
Raffaella Origa, et al.
http://www.haematologica.org/content/100/5/e169

e172 Mutations of ASXL1 and TET2 in aplastic anemia
Jinbo Huang, et al.
http://www.haematologica.org/content/100/5/e172

e176 Endogenous megakaryocytic colonies underline association between megakaryocytes and calreticulin mutations in essential thrombocytopenia
Julie Mondet, et al.
http://www.haematologica.org/content/100/5/e176
e179  c-Myc inhibition decreases CIP2A and reduces BCR-ABL1 tyrosine kinase activity in chronic myeloid leukemia
Claire M. Lucas, et al.
http://www.haematologica.org/content/100/5/e179

e183  CIP2A high expression is a poor prognostic factor in normal karyotype acute myeloid leukemia
Eva Barragán, et al.
http://www.haematologica.org/content/100/5/e183

e186  Late cardiomyopathy in childhood acute myeloid leukemia survivors: a study from the Leucemie Enfant & Adolescent program
Vincent Barlogis, et al.
http://www.haematologica.org/content/100/5/e186

e190  MLL partial tandem duplication leukemia cells are sensitive to small molecule DOT1L inhibition
Michael W.M. Kühn, et al.
http://www.haematologica.org/content/100/5/e190

e194  BCOR and BCORL1 mutations in pediatric acute myeloid leukemia
Jasmijn D.E. de Rooij, et al.
http://www.haematologica.org/content/100/5/e194

e196  Impact of additional genetic alterations on the outcome of patients with NPM1-mutated cytogenetically normal acute myeloid leukemia
Pierre Peterlin, et al.
http://www.haematologica.org/content/100/5/e196

e200  Chronic lymphocytic leukemia cells in lymph nodes show frequent NOTCH1 activation
Arantza Onaindia, et al.
http://www.haematologica.org/content/100/5/e200

e204  Single nucleotide polymorphisms in ABCB1 and CBR1 can predict toxicity to R-CHOP type regimens in patients with diffuse non-Hodgkin lymphoma
Lars P. Jordheim, et al.
http://www.haematologica.org/content/100/5/e204

e207  Subcutaneous versus intravenous bortezomib in patients with relapsed multiple myeloma: subanalysis of patients with renal impairment in the phase III MMY-3021 study
Philippe Moreau, et al.
http://www.haematologica.org/content/100/5/e207

Comments

e211  Confounding effect of cyclosporine dosing when comparing horse and rabbit antithymocyte globulin in patients with severe aplastic anemia
Mathalie Bleyzac, et al.
http://www.haematologica.org/content/100/5/e211

e213  Answer to “Confounding effect of cyclosporine dosing when comparing horse and rabbit antithymocyte globulin in patients with severe aplastic anemia”
Xingmin Feng, et al.
http://www.haematologica.org/content/100/5/e213

e214  On the safety of intravenous iron, evidence trumps conjecture
Michael Auerbach, et al.
http://www.haematologica.org/content/100/5/e214
