Cover Figure

Humanized mice as novel tools in hematology research. (Image created by www.somersault1824.com)

Editorials

1  Resolutions for the New Year
   Jan Cools

2  Innovation in the field of thrombocytopenias: achievements since the beginning of the century and promises for the future
   Carlo L. Balduini and Patrizia Noris

Review Articles

5  Humanized hemato-lymphoid system mice - *Leaders in Hematology* review series
   Alexandre P.A. Theocharides, et al.

20  Risk factors for relapse after allogeneic transplantation in acute myeloid leukemia
    Gert J. Ossenkoppele, et al.

Articles

Hematopoesis

26  The role of CD44 in fetal and adult hematopoietic stem cell regulation
    Huimin Cao, et al.

Iron Metabolism & Its Disorders

38  Second international round robin for the quantification of serum non-transferrin-bound iron and labile plasma iron in patients with iron-overload disorders
    Louise de Swart, et al.

Platelet Biology & Its Disorders

46  Cytoskeletal perturbation leads to platelet dysfunction and thrombocytopenia in variant forms of Glanzmann thrombasthenia
    Loredana Bury, et al.

Bone Marrow Failure

57  PPARγ antagonist attenuates mouse immune-mediated bone marrow failure by inhibition of T cell function
    Kazuya Sato, et al.

Acute Lymphoblastic Leukemia

68  Relapsed childhood acute lymphoblastic leukemia in the Nordic countries: prognostic factors, treatment and outcome
    Trausti Oskarsson, et al.
Chronic Lymphocytic Leukemia

**77**  Clinical significance of bax/bcl-2 ratio in chronic lymphocytic leukemia  
Maria Ilaria Del Principe, et al.

Plasma Cell Disorders

**86**  Risk factors for venous thromboembolism in immunoglobulin light chain amyloidosis  
Katherine M. Bever, et al.

Cell therapy & Immunotherapy

**91**  Impact of immunosuppressive drugs on the therapeutic efficacy of ex vivo expanded human regulatory T cells  
Cristiano Scottà, et al.

Letters to the Editor

Letters are available online only at www.haematologica.org/content/101/1.toc

**e1**  Ineffective erythropoiesis caused by binucleated late-stage erythroblasts in mDia2 hematopoietic specific knockout mice  
Yang Mei, et al.  
http://www.haematologica.org/content/101/1/e1

**e6**  Iron deficiency anemia treatment response to oral iron therapy: a pooled analysis of five randomized controlled trials  
Maureen M. Okam, et al.  
http://www.haematologica.org/content/101/1/e6

**e8**  Combination of Tmprss6-ASO and the iron chelator deferiprone improves erythropoiesis and reduces iron overload in a mouse model of beta-thalassemia intermedia  
Carla Casu, et al.  
http://www.haematologica.org/content/101/1/e8

**e12**  Risk of recurrent venous thromboembolism on progestin-only contraception: a cohort study  
Emmanuelle Le M algue, et al.  
http://www.haematologica.org/content/101/1/e12

**e15**  STAT1 activation in association with JAK2 exon 12 mutations  
Anna L. Godfrey, et al.  
http://www.haematologica.org/content/101/1/e15

**e20**  PAX5-ESRRB is a recurrent fusion gene in B-cell precursor pediatric acute lymphoblastic leukemia  
Yanara Marincevic-Zuniga, et al.  
http://www.haematologica.org/content/101/1/e20

**e24**  NUDT15 c.415C>T increases risk of 6-mercaptopurine induced myelosuppression during maintenance therapy in children with acute lymphoblastic leukemia  
Kanhatai Chingthong, et al.  
http://www.haematologica.org/content/101/1/e24
e27 Phase II trial of dose-adjusted EPOCH in untreated systemic anaplastic large cell lymphoma  
Kieron Dunleavy, et al.  
http://www.haematologica.org/content/101/1/e27

e30 Presensitization to HY antigens in female donors prior to transplant is not associated with male recipient post-transplant HY antibody development nor with clinical outcomes  
Hideki Nakasone, et al.  
http://www.haematologica.org/content/101/1/e30

e34 Allogeneic hematopoietic cell transplantation in acute myeloid leukemia with normal karyotype and isolated Nucleophosmin-1 (NPM1) mutation: outcome strongly correlates with disease status  
Ali Bazarbachi, et al.  
http://www.haematologica.org/content/101/1/e34

Comments  
Comments are available online only at www.haematologica.org/content/101/1.toc

e38 Comment on: ‘Homozygous knockout of the piezo1 gene in the zebrafish is not associated with anemia’  
Adèle Faucherre, et al.  
http://www.haematologica.org/content/101/1/e38

e39 Authors’ response to “Comment on: ‘Homozygous knockout of the piezo1 gene in the zebrafish is not associated with anemia’”  
Boris E. Shimukler, et al.  
http://www.haematologica.org/content/101/1/e39
