Volume 101, Issue 10: October 2016

Cover Figure
Artistic representation of the mutant KIT receptor on the cell surface. Image accompanies the review article on mastocytosis on page 1133. (Image created by www.somersault1824.com)

Editorials
1129 The complex relationship of Tribbles pseudokinase 1, PML/RARA and C/EBPα in leukemia: two possible couples but not a trio
Guillermo Velasco

1131 Matching inside and outside the HLA molecule in allogeneic hematopoietic stem cell transplantation
J. Alejandro Madrigal and Linda D. Barber

Review Articles
1133 Advanced systemic mastocytosis: from molecular and genetic progress to clinical practice
Celalettin Ustun, et al.

1144 Catching up with solid tumor oncology: what is the evidence for a prognostic role of programmed cell death-ligand 1/programmed cell death-1 expression in B-cell lymphomas?
Fabienne McClanahan, et al.

Articles
Coagulation & Its Disorders
1159 A population pharmacokinetic model for perioperative dosing of factor VIII in hemophilia A patients
Hendrika Hazendonk, et al.

Platelet Biology & Its Disorders
1170 Whole exome sequencing identifies genetic variants in inherited thrombocytopenia with secondary qualitative function defects
Ben Johnson, et al.

Bone Marrow Failure
1180 Marked overlap of four genetic syndromes with dyskeratosis congenita confounds clinical diagnosis
Amanda J. Walne, et al.

Myeloproliferative Disorders
1190 Stat5 is critical for the development and maintenance of myeloproliferative neoplasm initiated by Nf1 deficiency
Zohar Sachs, et al.

Chronic Myeloid Leukemia
1200 Nilotinib 300 mg twice daily: an academic single-arm study of newly diagnosed chronic phase chronic myeloid leukemia patients
Fausto Castagnetti, et al.
Acute Myeloid Leukemia

1208 Ciprofloxacin versus colistin prophylaxis during neutropenia in acute myeloid leukemia: two parallel patient cohorts treated in a single center
Michele Pohlen, et al.

1216 Acute myeloid leukemia cells polarize macrophages towards a leukemia supporting state in a Growth factor independence 1 dependent manner
Yahya S. Al-Matary, et al.

1228 Co-operative leukemogenesis in acute myeloid leukemia and acute promyelocytic leukemia reveals C/EBPα as a common target of TRIB1 and PML/RARA
Karen Keeshan, et al.

Hodgkin Lymphoma

1237 Definition of bulky disease in early stage Hodgkin lymphoma in computed tomography era: prognostic significance of measurements in the coronal and transverse planes
Anita Kumar, et al.

Non-Hodgkin Lymphoma

1244 Non-Hodgkin lymphoma in the developing world: review of 4539 cases from the International Non-Hodgkin Lymphoma Classification Project
Anamaria M. Perry, et al.

Cell Therapy & Immunotherapy

1251 A phase I study of CD25/regulatory T-cell-depleted donor lymphocyte infusion for relapse after allogeneic stem cell transplantation
Sarah Nikiforow, et al.

1260 Donor and recipient sex in allogeneic stem cell transplantation: what really matters
Haesook T. Kim, et al.

1267 Human leukocyte antigen supertype matching after myeloablative hematopoietic cell transplantation with 7/8 matched unrelated donor allografts: a report from the Center for International Blood and Marrow Transplant Research
Aleksandr Lazaryan, et al.

Letters to the Editor

Letters are available online only at www.haematologica.org/content/101/10.toc

e392 Specific antibody deficiency and autoinflammatory disease extend the clinical and immunological spectrum of heterozygous NFKB1 loss-of-function mutations in humans
Cyrill Schipp, et al.
http://www.haematologica.org/content/101/10/e392

e397 Genetic inactivation of calpain-1 attenuates pain sensitivity in a humanized mouse model of sickle cell disease
Jennifer O. Nwankwo, et al.
http://www.haematologica.org/content/101/10/e397

e401 Neutrophil to lymphocyte ratio and future risk of venous thromboembolism and mortality: the Tromso Study
Gro Grimnes, et al.
http://www.haematologica.org/content/101/10/e401

e405 Discrepancies of applying primary myelofibrosis prognostic scores for patients with post polycythemia vera/essential thrombocytosis myelofibrosis
Krisstina Gowin, et al.
http://www.haematologica.org/content/101/10/e405
**e407** European phase II study of mogamulizumab, an anti-CCR4 monoclonal antibody, in relapsed/refractory peripheral T-cell lymphoma
Pier Luigi Zinzani, et al.
http://www.hematologica.org/content/101/10/e407

**e411** Maintenance rituximab following induction R-CHOP chemotherapy in patients with composite or discordant, indolent and aggressive, B-cell non-Hodgkin lymphomas
Roopesh Karisara, et al.
http://www.hematologica.org/content/101/10/e411

**e415** Baseline bone involvement in multiple myeloma – a prospective comparison of conventional X-ray, low-dose computed tomography, and ¹⁸F-fluorodeoxyglucose positron emission tomography in previously untreated patients
Maja Hinge, et al.
http://www.hematologica.org/content/101/10/e415

**e419** Bone healing in multiple myeloma: a prospective evaluation of the impact of first-line anti-myeloma treatment
Maja Hinge, et al.
http://www.hematologica.org/content/101/10/e419

**e423** Identification of a new potential mechanism responsible for severe bleeding in myeloma: immunoglobulins bind the heparin binding domain of antithrombin activating this endogenous anticoagulant
Irene Martinez-Martinez, et al.
http://www.hematologica.org/content/101/10/e423

**e427** Predicting outcome of patients with myelodysplastic syndromes after failure of azacitidine: validation of the North American MDS consortium scoring system
Thomas Prebet, et al.
http://www.hematologica.org/content/101/10/e427

**e429** The higher prevalence of missense mutations in hemophilia B compared to hemophilia A could be important in determining a milder clinical phenotype in patients with severe hemophilia B
Daniela Melchiorre, et al.
http://www.hematologica.org/content/101/10/e429

**e430** A contribution to the debate about the possible different clinical severity between hemophilia A and B
Daniela Melchiorre, et al.
http://www.hematologica.org/content/101/10/e430
