Table of Contents
Volume 102, Issue 7: July 2017

Cover Figure

Editorials

1131 Chronic myeloid leukemia: room for improvement?
Michele Baccarani et al.

1133 Minimal residual disease in mantle cell lymphoma: are we ready for a personalized treatment approach?
Simone Ferrero and Martin Dreyling

1137 Antithymocyte globulin and transplants for aplastic anemia
Andrea Bacigalupo

Review Article

1139 Genetic background and evolution of relapses in aggressive B-cell lymphomas
Darius Juskevicius et al.

Articles

Hematopoiesis

1150 A new path to platelet production through matrix sensing
Vittorio Abbonante et al.

Red Cell Biology & Its Disorders

1161 The endothelin B receptor plays a crucial role in the adhesion of neutrophils to the endothelium in sickle cell disease
Bérengère Koehl et al.

Iron Metabolism & Its Disorders

1173 Imatinib and spironolactone suppress hepcidin expression
Katarzyna Mleczko-Sanecka et al.

Coagulation & Its Disorders

1185 Venous thromboembolism is associated with graft-versus-host disease and increased non-relapse mortality after allogeneic hematopoietic stem cell transplantation
Natasha Kekre et al.

Platelet Biology & Its Disorders

1192 Bleeding risk of surgery and its prevention in patients with inherited platelet disorders
Sara Orsini et al.

Acute Myeloid Leukemia

1204 Epigenetically induced ectopic expression of UNCX impairs the proliferation and differentiation of myeloid cells
Giulia Daniele et al.
1215 A three-dimensional *ex vivo* tri-culture model mimics cell-cell interactions between acute myeloid leukemia and the vascular niche
Laura J. Bray et al.

1227 Precision and prognostic value of clone-specific minimal residual disease in acute myeloid leukemia
Pierre Hirsch et al.

**Chronic Lymphocytic Leukemia**

1238 Host virus and pneumococcus-specific immune responses in high-count monoclonal B-cell lymphocytosis and chronic lymphocytic leukemia: implications for disease progression
Ignacio Criado et al.

**Non-Hodgkin Lymphoma**

1247 Inhibition of monocarboxyate transporter 1 by AZD3965 as a novel therapeutic approach for diffuse large B-cell lymphoma and Burkitt lymphoma
Richard A. Noble et al.

1258 Development of a modified prognostic index for patients with aggressive adult T-cell leukemia-lymphoma aged 70 years or younger: possible risk-adapted management strategies including allogeneic transplantation
Shigeo Fuji et al.

**Plasma Cell Disorders**

1266 Monitoring multiple myeloma by quantification of recurrent mutations in serum
Even Holth Rustad et al.

1273 Resistin induces multidrug resistance in myeloma by inhibiting cell death and upregulating ABC transporter expression
Jianan Pang et al.

1281 Novel recurrent chromosomal aberrations detected in clonal plasma cells of light chain amyloidosis patients show potential adverse prognostic effect: first results from a genome-wide copy number array analysis
Martin Granzow et al.

**Cell Therapy & Immunotherapy**

1291 Effect of antithymocyte globulin source on outcomes of bone marrow transplantation for severe aplastic anemia
Natasha Kekre et al.

**Letters to the Editor**

Letters are available online only at www.haematologica.org/content/102/7.toc

**e241** Enhanced calreticulin expression in red cells of polycythemia vera patients harboring the JAK2*V617F* mutation
Mégane Brusson et al.
http://www.haematologica.org/content/102/7/e241

**e245** An extracellular matrix signature in leukemia precursor cells and acute myeloid leukemia
Valerio Izzi et al.
http://www.haematologica.org/content/102/7/e245

**e249** NOTCH1 mutation, TP53 alteration and myeloid antigen expression predict outcome heterogeneity in children with first relapse of T-cell acute lymphoblastic leukemia
Jana Hof et al.
http://www.haematologica.org/content/102/7/e249

**e253** Role of *miR-15a/miR-16-1* and the TP53 axis in regulating telomerase expression in chronic lymphocytic leukemia
Enrica Rampazzo et al.
http://www.haematologica.org/content/102/7/e253
e257  Sphingosine kinase 1 participates in the activation, proliferation and survival of chronic lymphocytic leukemia cells
María Belén Almejún et al.
http://www.haematologica.org/content/102/7/e257

e261  Double autophagy stimulation using chemotherapy and mTOR inhibition combined with hydroxychloroquine for autophagy modulation in patients with relapsed or refractory multiple myeloma
Emma C. Scott et al.
http://www.haematologica.org/content/102/7/e261

e266  Both mucosal-associated invariant and natural killer T-cell deficiency in multiple myeloma can be countered by PD-1 inhibition
Mérédis Favreau et al.
http://www.haematologica.org/content/102/7/e266

e271  Salvage use of allogeneic hematopoietic stem cell transplantation after reduced intensity conditioning from unrelated donors in multiple myeloma. A study by the Plasma Cell Disorders subcommittee of the European Group for Blood and Marrow Transplant Chronic Malignancies Working Party
Mohamad Sobh et al.
http://www.haematologica.org/content/102/7/e271

Case Reports
Case Reports are available online only at www.haematologica.org/content/102/7.toc

e275  Combination of ibrutinib and chemotherapy produced a durable remission in multiply relapsed diffuse large B-cell lymphoma leg type with mutant MYD88 and wildtype CD79
Andrew L. Deng et al.
http://www.haematologica.org/content/102/7/e275

e278  Mutations in the adaptor-binding domain and associated linker region of p110δ cause Activated PI3K-δ Syndrome 1 (APDS1)
Lucie Heurtier et al.
http://www.haematologica.org/content/102/7/e278
