Volume 104, Issue 2: February 2019

Cover Figure

Bone marrow smear showing an erythroblastic island in a girl treated with chemotherapy for acute lymphoblastic leukemia. Courtesy of Prof. Rosangela Invernizzi.

Editorials

- 215** Antithymocyte globulin and cyclosporin: standard of care also for older patients with aplastic anemia
Andrea Bacigalupo
- 216** Milk and the “Grandmother Effect”— a new contribution to the legacy of Ray Owen
William J. Burlingham
- 219** Another step forward in the 20-year history of *IGHV* mutations in chronic lymphocytic leukemia
Ilaria Del Giudice and Robin Foà
- 222** The stepchild in myeloma treatments: is allogeneic transplantation not so bad after all?
Antonia M.S. Müller et al.

Review Articles

- 226** CD30-positive primary cutaneous lymphoproliferative disorders: molecular alterations and targeted therapies
Lucia Prieto-Torres et al.
- 236** Pathogenic immune response to therapeutic factor VIII: exacerbated response or failed induction of tolerance?
Aditi Varthaman et al.

Articles

Hematopoiesis

- 245** Rheb1 loss leads to increased hematopoietic stem cell proliferation and myeloid-biased differentiation *in vivo*
Xiaomin Wang et al.

Bone Marrow Failure

- 256** Aplastic anemia in the elderly: a nationwide survey on behalf of the French Reference Center for Aplastic Anemia
Adrien Contejean et al.

Red Cell Biology & its Disorders

- 263** Exposure to non-inherited maternal antigens by breastfeeding affects antibody responsiveness
Henk Schonewille et al.

Phagocyte Biology & its Disorders

- 269** Treatment outcomes and prognostic factors in adult patients with secondary hemophagocytic lymphohistiocytosis not associated with malignancy
Jae-Ho Yoon et al.

Acute Myeloid Leukemia

- 277** Comprehensive genetic diagnosis of acute myeloid leukemia by next-generation sequencing
Elisabeth K.M. Mack et al.
- 288** A novel deep targeted sequencing method for minimal residual disease monitoring in acute myeloid leukemia
Esther Onecha et al.

297 Targeted RNA-sequencing for the quantification of measurable residual disease in acute myeloid leukemia
Laura W. Dillon et al.

305 Persistent *IDH1/2* mutations in remission can predict relapse in patients with acute myeloid leukemia
Chi Young Ok et al.

Acute Lymphoblastic Leukemia

312 Prognostic implications of additional genomic lesions in adult Philadelphia chromosome-positive acute lymphoblastic leukemia
Anna Lucia Fedullo et al.

319 Hypersensitivity reactions to asparaginase in mice are mediated by anti-asparaginase IgE and IgG and the immunoglobulin receptors FcεRI and FcγRIII
Sanjay Rathod et al.

Non-Hodgkin Lymphoma

330 *JUNB*, *DUSP2*, *SGK1*, *SOCS1* and *CREBBP* are frequently mutated in T-cell/histiocyte-rich large B-cell lymphoma
Bianca Schuhmacher et al.

338 T-cell inflamed tumor microenvironment predicts favorable prognosis in primary testicular lymphoma
Suvi-Katri Leivonen et al.

347 miR-497 suppresses cycle progression through an axis involving CDK6 in ALK-positive cells
Coralie Hoareau-Aveilla et al.

Chronic Lymphocytic Leukemia

360 Tailored approaches grounded on immunogenetic features for refined prognostication in chronic lymphocytic leukemia
Panagiotis Baliakas et al.

Plasma Cell Disorders

370 Allogeneic transplantation of multiple myeloma patients may allow long-term survival in carefully selected patients with acceptable toxicity and preserved quality of life
Christine Greil et al.

380 Long-term follow up of tandem autologous-allogeneic hematopoietic cell transplantation for multiple myeloma
Enrico Maffini et al.

Stem Cell Transplantation

392 The TLR7 ligand R848 prevents mouse graft-versus-host disease and cooperates with anti-interleukin-27 antibody for maximal protection and regulatory T-cell upregulation
Mélanie Gaignage et al.

Blood Transfusion

403 Anti-HLA antibodies with complementary and synergistic interaction geometries promote classical complement activation on platelets
Maaïke Rijkers et al.

Letters to the Editor

Letters are available online only at www.haematologica.org/content/104/2.toc

e47 Endothelial protein C receptor (EPCR) expression marks human fetal liver hematopoietic stem cells
Agatheeswaran Subramaniam et al.
<http://www.haematologica.org/content/104/2/e47>

e51 Prevalence and management of iron overload in pyruvate kinase deficiency: report from the Pyruvate Kinase Deficiency Natural History Study
Eduard J. van Beers et al.
<http://www.haematologica.org/content/104/2/e51>

- e54** Bone marrow mesenchymal stem/stromal cells from risk-stratified acute myeloid leukemia patients are anti-inflammatory in *in vivo* pre-clinical models of hematopoietic reconstitution and severe colitis
Rafael Diaz de la Guardia et al.
<http://www.haematologica.org/content/104/2/e54>
- e59** Relationship between CD33 expression, splicing polymorphism, and *in vitro* cytotoxicity of gemtuzumab ozogamicin and the CD33/CD3 BITE® AMG 330
George S. Laszlo et al.
<http://www.haematologica.org/content/104/2/e59>
- e63** Continuous high dosing of lenalidomide in relapsed, refractory or older newly diagnosed acute myeloid leukemia patients not suitable for other treatment options - results from a phase I study
Marie Luise Hütter-Krönke et al.
<http://www.haematologica.org/content/104/2/e63>
- e65** ABVD plus rituximab *versus* ABVD alone for advanced stage, high-risk classical Hodgkin lymphoma: a randomized phase 2 study
Paolo Strati et al.
<http://www.haematologica.org/content/104/2/e65>
- e68** Efficacy of venetoclax monotherapy in patients with relapsed, refractory mantle cell lymphoma after Bruton tyrosine kinase inhibitor therapy
Toby A. Eyre et al.
<http://www.haematologica.org/content/104/2/e68>
- e72** Long non-coding RNA NEAT1 shows high expression unrelated to molecular features and clinical outcome in multiple myeloma
Elisa Taiana et al.
<http://www.haematologica.org/content/104/2/e72>

Case Reports to the Editor

Case Reports are available online only at www.haematologica.org/content/104/2.toc

- e77** Unrelated cord blood transplantation and post-transplant cyclophosphamide
Andrea Bacigalupo et al.
<http://www.haematologica.org/content/104/2/e77>
- e79** MPI-CDG with transient hypoglycosylation and antithrombin deficiency
María Eugenia de la Morena-Barrio et al.
<http://www.haematologica.org/content/104/2/e79>
- e83** Disappearance of a strong triple positivity for antiphospholipid antibodies after treatment with anakinra
Erik Arnaud et al.
<http://www.haematologica.org/content/104/2/e83>

Comments

Comments are available online only at www.haematologica.org/content/104/2.toc

- e85** Prevention of serious infections in hereditary hemorrhagic telangiectasia: roles for prophylactic antibiotics, the pulmonary capillaries- but not vaccination
Claire Shovlin et al.
