Volume 104, Issue 8: August 2019

Cover Figure

Bone marrow smear showing a giant plasmablast with two macronucleoli and deeply basophilic cytoplasm with Immunoglobulin accumulation in the form of amorphous substance or crystals in a patient with plasma cell myeloma. Courtesy of Prof. Rosangela Invernizzi.

Editorials

- 1503** Does iron let boys grow faster?!
Günter Weiss
- 1505** The wolf of hypomethylating agent failure: what comes next?
Anne Sophie Kubasch and Uwe Platzbecker
- 1508** Discontinuation of tyrosine kinase inhibitors in patients with chronic myelogenous leukemia: it may be easier than you think
Charles A. Schiffer
- 1511** The only thing that stops a bad microbiome, is a good microbiome
Jessica R. Galloway-Peña and Robert R. Jenq
- 1513** Predicting risk for recurrence of arterial ischemic stroke in children: thrombophilia as another piece of the puzzle
Ghada Aborkhees and Lesley Gayle Mitchell

Perspective Article

- 1515** “Somatic” and “pathogenic” - is the classification strategy applicable in times of large-scale sequencing?
Constance Baer et al.

Review Articles

- 1521** Which are the most promising targets for minimal residual disease-directed therapy in acute myeloid leukemia prior to allogeneic stem cell transplant?
Brian Ball and Eytan M. Stein
- 1532** How close are we to incorporating measurable residual disease into clinical practice for acute myeloid leukemia?
Nicholas J. Short and Farhad Ravandi

Articles

Iron Metabolism & its Disorders

- 1542** Rapid growth is a dominant predictor of hepcidin suppression and declining ferritin in Gambian infants
Andrew E. Armitage et al.

Red Cell & its Disorders

- 1554** Clinical and biological features in *PIEZO1*-hereditary xerocytosis and Gardos channelopathy: a retrospective series of 126 patients
Véronique Picard et al.

Myelodysplastic Syndromes

- 1565** A phase II study of guadecitabine in higher-risk myelodysplastic syndrome and low blast count acute myeloid leukemia after azacitidine failure
Marie Sébert et al.

Myeloproliferative Neoplasms

- 1572** Epigenomic profiling of myelofibrosis reveals widespread DNA methylation changes in enhancer elements and *ZFP36L1* as a potential tumor suppressor gene that is epigenetically regulated
Nicolás Martínez-Calle et al.

Myeloproliferative Neoplasms

- 1580** Characteristics and outcomes of patients with essential thrombocythemia or polycythemia vera diagnosed before 20 years of age: a systematic review
Jean-Christophe Ianotto et al.

Chronic Myeloid Leukemia

- 1589** Observational study of chronic myeloid leukemia Italian patients who discontinued tyrosine kinase inhibitors in clinical practice
Carmen Fava et al.

Acute Myeloid Leukemia

- 1597** RUNX1 inhibits proliferation and induces apoptosis of t(8;21) leukemia cells via KLF4-mediated transactivation of P57
Shuang Liu et al.

Acute Lymphoblastic Leukemia

- 1608** ZEB2 and LMO2 drive immature T-cell lymphoblastic leukemia via distinct oncogenic mechanisms
Steven Goossens et al.
- 1617** DNMT3A mutation is associated with increased age and adverse outcome in adult T-cell acute lymphoblastic leukemia
Jonathan Bond et al.

Non-Hodgkin Lymphoma

- 1626** Human leukocyte antigen class II expression is a good prognostic factor in adult T-cell leukemia/lymphoma
Mai Takeuchi et al.
- 1633** The novel CD19-targeting antibody-drug conjugate huB4-DGN462 shows improved anti-tumor activity compared to SAR3419 in CD19-positive lymphoma and leukemia models
Stuart W. Hicks et al.

Plasma Cell Disorders

- 1640** Once-weekly versus twice-weekly carfilzomib in patients with newly diagnosed multiple myeloma: a pooled analysis of two phase I/II studies
Sara Brinthen et al.

Platelet Biology & its Disorders

- 1648** Platelet glycoprotein VI and C-type lectin-like receptor 2 deficiency accelerates wound healing by impairing vascular integrity in mice
Surasak Wichaiyo et al.
- 1661** All-trans retinoic acid protects mesenchymal stem cells from immune thrombocytopenia by regulating the complement–interleukin-1 β loop
Xiaolu Zhu et al.

Hemostasis

- 1676** Recurrent stroke: the role of thrombophilia in a large international pediatric stroke population
Gabrielle deVeber et al.

Stem Cell Transplantation

- 1682** Fecal microbiota transplantation before or after allogeneic hematopoietic transplantation in patients with hematologic malignancies carrying multidrug-resistance bacteria
Giorgia Battipaglia et al.

Letters to the Editor

Letters are available online only at www.haematologica.org/content/104/8.toc
