Haematologica

is a Latin adjective, neuter and plural, used in this context as a noun:
it means “hematological subjects”.
The appropriate English translation is therefore
Journal of Hematology.

On the cover. Bone marrow smear from a 18-year-old boy with acute monoblastic leukemia (M5a) associated with t(8;16) (p11;p13). Blasts are large with abundant cytoplasm and irregular nucleus; they contain rare Auer bodies (left) and show erythrophagocytosis (right) (MGG x1200). (Courtesy of Dr. R. Invernizzi, Pavia, Italy).
