editorial
Spanish contributions to management of acute promyelocytic leukemia

561-562

original papers

The cyclin D1 alternative transcripts [a] and [b] are expressed in normal and malignant lymphocytes and their relative levels are influenced by the polymorphism at codon 241
Denise Howe, Caroline Lynes

563-569

Variability in the levels of PML–RARα fusion transcripts detected by the laboratories participating in an external quality control program using several reverse transcription polymerase chain reaction protocols
Pascual Bolífer, Francesco Lo Coco, David Gnmade, Eva Barragan, Daniela Divizia, Anna Cossinot, Chihsuine Chamerme, Marcan González, Dolores Colomer, María-Teresa Gómez, Isabel Marugan, José Román, Maria-Dolores Delgado, José-Antonio García-Marco, Rafael Bernal, José-Luis Vizmanos, Beatriz Martínez, Joop Jensen, Ana Villegas, José-Maria de Bia, Pablo Caballero, Miguel-Angel Sanz

570-576

The PML–RARα transcript in long–term follow-up of acute promyelocytic leukemia patients
Paula Gama, Sara Vieira, Paola Carrara, Ana Luisa Silva, Joanna Diamond, Aida Botelho de Sousa, Atul B Mehta, H. Grant Frentice, José Eduardo Gamerdas, A. Victor Hoffbrand, Letizia Forani, Antonio Parreira

577-585

Early and delayed consolidation chemotherapy significantly improves the outcome of children with intermediate risk acute lymphoblastic leukemia: Final results of the prospective randomized PETHEMA ALL–95 TRIAL
Juan–José Ortego, Jose–Maria Ribera, Albert Oriol, Pilar Bassign, Mario–Eivina González, Carlota Calvo, Iisasko Eguíbide, Jesús–Maria Hernández Rivas, Concepción Rives, Antonio Alcalá, Joan Besalduch, Joan Macià, Santiago Gardeja, Mercedes Carreño, Jose–Manuel Lleó, Francisco Casanova, Miguel Martinez, Montserrat Fontenillas, Evain Feliu, José–Santiago San Miguel, on behalf of PETHEMA Group, Spanish Society of Hematology

586-595

Ten–year follow–up of a single center prospective trial of unmanipulated peripheral blood stem cell autograft and interferon–α in early phase chronic myeloid leukemia
Giovanna Meloni, Saveria Capria, Marco Vignetti, Giuliana Alimena, Paolo de Fabritiis, Enrico Montefusco, Franco Mandelli

596-601

No substantial difference in genotype frequencies of interleukin and myeloperoxidase polymorphisms between malignant lymphoma patients and non–cancer controls
Ketaro Maissa, Nobuyuki Hamajima, Risuro Suzuki, Shigeo Nakamura, Masako Sato, Yasuo Morishima, Kazuo Tujima

602–608

Treatment of low grade gastric mucosa–associated lymphoid tissue lymphoma in stage I with Helicobacter pylori eradication
Long–term results after sequential histologic and molecular follow–up
Carlos Montabon, Almudena Santan, Daniel Boixeda, Clara Redondo, Isabel Alvarez, Jose Luis Calleja, Carlos Martin de Argila, Carmen Belles

609–617

Anti–CD20 antibody (rituximab) administration in patients with late occurring lymphomas after solid organ transplant
Gianpietro Dotti, Alessandra Rambaldi, Roberto Fiocchi, Teresa Motta, Giuliana Torre, Piera Viero, Bruna Gridelli, Tiziana Barbui

618–623

Successful pregnancies following an egg donation program in women with previously treated Hodgkin's disease
Anna Paolo Arsenele, Elena Caviezi, Cesare Aragona, Marco Sbrocia, Dara Funaro, Riccardo Maurizi Enrici

624–628

A missense mutation (Y1702C) in the coagulation factor V gene is a frequent cause of factor V deficiency in the Italian population
Elsabetta Castoldi, Barbara Lunghi, Federica Minguoli, Gaetano Muleo, Rosaria Reddei, Guglielmo Mariani, Francesco Bernardi

629–633

Inherited thrombophilic risk factors in a large cohort of individuals referred to Italian thrombophilia centers: distinct roles in different clinical settings
Maurizio Margaglione, Vincenzo Brancaccio, Antonia Chiampa, Maria Luisa Papa, Elvira Grandone, Giovanni Di Minno

634–639
Pharmacokinetic evaluation of recombinant, activated factor VII in patients with inherited factor VII deficiency
Mauro Berrettini, Guglielmo Morani, Maria Schiavoni, Angiola Rocina, Tiziana Di Fondi, Giovanni Longo, Massimo Martini .................................. 640-645

Conventional hematopoietic stem cell transplants from identical or alternative donors are feasible in recipients relapsing after an autograft
Carmela di Grazia, Anna Maria Raola, Maria Teresa Ven Lint, Teresa Lempari, Francesca Guialandi, Giovanni Berizzo, Stefano Bregante, Alfredo Domini, Nicola Modini, Bartore Bruno, Francesco Franceschi, Andrea Barlégio ........................................................................ 646-651

Helper T-lymphocyte precursor frequency predicts the occurrence of graft-versus-host disease and disease relapse after allogeneic bone marrow transplantation from HLA-identical siblings
Ansiar Y.H. Leung, Jonette Kwok, Albert K.W. Leo, Paul Chen, Frederick E. Chen, Raymond Liang ................................................................. 652-656

scientific correspondence

Molecular characterization of thalassemia intermedia with homozygous Hb Malay and Hb Malay/HE in Thai patients
Sapan Fucharaen, Kanokwan Sancharasiriya, Goomata Fucharaen, Sutja Surapop ................................................................. 657-658

Metoclopramide-induced methemoglobinemia in a patient with co-existing deficiency of glucose-6-phosphate dehydrogenase and NADH-cytochrome b5 reductase: failure of methylene blue treatment
Naif S. Kadri, Shabab, Bassem Raitour ........................................... 659-660

Elevated plasma thrombopoietin levels and thrombosis in essential thrombocythemia: a preliminary report
Rossella R. Caccio, Carmela Ferlito, Giuliana G. Guevara, Salvatore Salem, Rosario Giustoli, Emma Caccia .................................................. 661-662

Predictive prognostic factors after splenectomy in patients with idiopathic thrombocytopenic purpura
Chih-Cheng Chen, Chao-Hung Ho, Izung-Shian Wu, Jian-Sheng Wu, Jie-Yu You, Wing-Keung Chau, Hui-Chi Hsu, Jyh-Pyng Guo ........................................... 663-664

A randomized, prospective comparison of allogeneic bone marrow and peripheral blood progenitor cell transplantation in the treatment of hematologic malignancies: an update
Afonso Celso Vigoto, José Francisco Cordeiro Marques Jr. Francisco, José Penteado Aranha, Giseline Barbosa Oliveira, Eliana Cristina Martins, Miranda, Carmo Antonio De Souza ........................................... 665-666

Diminished T-cell recovery after CD34+ selected autologous peripheral blood stem cell transplantation increases the risk of cytomegalovirus infection
Mitoumi Nishio, Kazuki Koizumi, Tomoyuki Endo, Katsuya Fujimoto, Takao Koike, Ken-ichi Seward .................................................. 667-668

An autopsy-based retrospective study of secondary thrombotic thrombocytopenic purpura
Hisashi Iwata, Masahiro Kami, Arika Hari, Tamee Homaki, Kengo Takeuchi, Yoshiyuki Mutai .................................................. 669-670

the irreplaceable image

Orbital involvement in multiple myeloma
Pierangelo Spedini, Sergio Morandi .................................................. 671

An unexpected manifestation of anemia
Maria Christine Corrara, Luca Rossetti, Gian Carla Gerli .................................................. 672
