

editorials, comments & views

- Erythropoietin therapy: need for rationality and active surveillance**
Mario Cazzola601-605
- When the bullet hits the target**
Vittorio Rosti.....605-607
- Thrombosis and malignancy: an underestimated problem**
Anna Falanga.....607-610
- The treatment of venous thromboembolic disorders: new challenges and opportunities**
Paolo Prandoni.....610-613

research papers

- Homing of peripherally injected bone marrow cells in the rat after experimental myocardial injury**
Michele M. Ciulla, Lorenza Lazzari, Raffaella Pacchiana, Arturo Esposito, Silvano Bosari, Stefano Ferrero, Umberto Gianelli, Roberta Paliotti, Giuseppe Busca, Alessandra Giorgetti, Fabio Magrini, Paolo Rebulli.....614-621
- p53 loss of function enhances genomic instability and accelerates clonal evolution of murine myeloid progenitors expressing the p²¹⁰BCR-ABL tyrosine kinase**
Gianluca Brusa, Michela Benvenuti, Lucia Mazzacurati, Manuela Mancini, Laura Pattacini, Giovanni Martinelli, Enza Barbieri, Joel S. Greenberger, Michele Baccarani, Maria Alessandra Santucci.....622-630
- Erythroid bone marrow activity and red cell hemoglobinization in iron-sufficient β -thalassemia heterozygotes as reflected by soluble transferrin receptor and reticulocyte hemoglobin content. Correlation with genotypes and Hb A₂ levels**
Christophille Skarmoutsou, Ioannis Papassotiriou, Joanne Traeger-Synodinos, Helene Stamou, Vassilios Ladis, Anna Metaxotou-Mavrommati, Alexandra Stamoulakatou, Emmanuel Kanavakis.....631-636
- Immunophenotypic findings in acute myeloid leukemia with FLT3 internal tandem duplication**
Luz Muñoz, Ana Aventin, Neus Villamor, Jordi Juncà, Gemma Acebedo, Alicia Domingo, Maria Rozman, J. Pio Torres, Mar Tormo, Josep F. Nomdedéu.....637-645
- Detection of minimal residual disease in unselected patients with acute myeloid leukemia using multiparameter flow cytometry to define of leukemia-associated immunophenotypes and determine of their frequencies in normal bone marrow**
Wolfgang Kern, Susanne Danhauser-Riedl, Richard Ratei, Susanne Schnittger, Claudia Schoch, Hans-Jochem Kolb, Wolf-Dieter Ludwig, Wolfgang Hiddemann, Torsten Haferlach.....646-653
- Lymphotoxin β expression is high in chronic lymphocytic leukemia but low in small lymphocytic lymphoma: quantitative real-time reverse transcriptase polymerase chain reaction analysis on hematologic malignancies**
Bálint Nagy, Anna Ferrer, Marcelo L. Larramendy, Sara Galimberti, Yan Aalto, Silvia Casas, Juhani Vilpo, Tapani Ruutu, Kim Vettentranta, Kaarle Franssila, Sakari Knuutila.....654-658
- Molecular immunoglobulin/T- cell receptor clonality analysis in cutaneous lymphoproliferations. Experience with the BIOMED-2 standardized polymerase chain reaction protocol**
Yorick Sandberg, Freerk Heule, King Lam, Pieternella J. Lugtenburg, Ingrid L.M. Wolvers-Tettero, Jacques J.M. van Dongen, Anton W. Langerak.....659-670
- B-cell non-Hodgkin's lymphomas express heterogeneous patterns of neovascularization**
Enrico Crivellato, Beatrice Nico, Angelo Vacca, Domenico Ribatti.....671-678
- Low platelet counts alone do not cause bleeding in an experimental model of immune thrombocytopenic purpura in mice**
Victoria Dominguez, Tzipe Govezensky, Goar Gevorkian, Carlos Larralde.....679-687

Fainting induces an acute increase in the concentration of plasma factor VIII and von Willebrand factor
Alessandra Casonato, Elena Pontara, Antonella Bertomoro, Maria Grazia Cattini, Carmen Soldera, Antonio Girolami.....688-693

Effect of unfractionated heparin and a low molecular weight heparin (enoxaparin) on coagulant activity of cultured human endothelial cells
Vicenta Martinez-Sales, Virtudes Vila, Edelmiro Réganon, Javier Garcia Oms, Justo Aznar.....694-699

decision making and problem solving

International and Italian prognostic indices in follicular lymphoma
Granada Perea, Albert Altés, Silvia Montoto, Armando López-Guillermo, Francesc Bosch, Mónica Jiménez, Jordi Esteve, Eva Domingo, Josep M. Ribera, Carmen Pedro, Rodrigo Martino, Javier Briones, Anna Sureda, Salut Brunet, Jorge Sierra, Emili Montserrat.....700-704

trends in thrombosis and hemostasis – Siset review

Levels of coagulation factors and venous thromboembolism
Armando Tripodi.....705-711

letters to the editor

The influence of exercise on serum markers of altered erythropoiesis and the indirect detection models of recombinant human erythropoietin abuse in athletes
Yorck Olaf Schumacher, Jens Temme, Dirk Bueltermann, Andreas Schmid, Aloys Berg.....712-714

Isochromosome 17q in patients with myelodysplastic syndromes: six new cases
Zhijian Xiao, Shihe Liu, Minghua Yu, Zefeng Xu, Yushu Hao.....714-715

Evaluation of leukemic contamination in peripheral blood stem cell leukaphereses vs bone marrow after consolidation therapy in acute myeloid leukemia: not a critical factor in outcome?
Lorella Melillo, Giorgina Specchia, Felicetto Ferrara, Marta Minervini, Domenico Pastore, Angelo M. Carella.....715-717

Once weekly recombinant human erythropoietin therapy is very efficient after allogeneic peripheral blood stem cell transplantation when started soon after engraftment
Frédéric Baron, Pascale Frère, Yves Beguin.....718-720
