

**This Month in Haematologica**

385-388 April 2004

**Editorials, Comments & Views**

389-390 Novel prognostic factors for patients with acute myeloid leukemia

**Research Papers**

- 391-402 *Acute Myeloid Leukemia*  
Osteoblasts increase proliferation and release of pro-angiogenic interleukin-8 by native human acute myelogenous leukemia blasts  
*Øystein Bruserud, Anita Rynningen, Line Wergeland, Nils Idar Glenjen, Bjørn Tore Gjertsen*
- 403-407 *Acute Myeloid Leukemia*  
Partial duplication of the MLL oncogene in patients with aggressive acute myeloid leukemia  
*Constantina Sambani, Roberta La Starza, Christophe Roumier, Barbara Crescenzi, Chryssa Stavropoulou, Olga Katsarou, Anastasia Karafoulidou, Jean Hugues Dhalle, Jean Luc Lai, Claude Preudhomme, Massimo Fabrizio Martelli, Cristina Mecucci*
- 408-418 *Acute Lymphoblastic Leukemia*  
A new prognostic score for patients with acute myeloid leukemia based on cytogenetics and early blast clearance trials of the German AML Cooperative Group  
*Torsten Haferlach, Wolfgang Kern, Claudia Schoch, Susanne Schnittger, Maria Cristina Sauerland, Achim Heinecke, Thomas Büchner, Wolfgang Hiddemann*
- 419-426 *Acute Lymphoblastic Leukemia*  
Use of a novel histone deacetylase inhibitor to induce apoptosis in cell lines of acute lymphoblastic leukemia  
*Annette Romanski, Biserka Bacic, Gesine Bug, Heike Pfeifer, Hilal Guel, Stacy Remiszewski, Dieter Hoelzer, Peter Atadja, Martin Ruthardt, Oliver G. Ottmann*
- 427-434 *Acute Lymphoblastic Leukemia*  
Outcome of very late relapse in children with acute lymphoblastic leukemia  
*Carmelo Rizzari, Maria Grazia Valsecchi, Maurizio Aricò, Roberto Miniero, Chiara Messina, Giulio De Rossi, Anna Maria Testi, Rossella Mura, Stefania Galimberti, Andrea Biondi, Franco Locatelli, Valentino Conter*
- 435-443 *Lymphoproliferative Disorders*  
Cytotoxic CD4<sup>+</sup> T cells in patients with B-cell chronic lymphocytic leukemia kill via a perforin-mediated pathway 1  
*Nino Porakishvili, Lela Kardavax, Andrew P. Jewell, Kwee Yong, Martin J. Glennie, Arne Akbar, Peter M. Lydyard*

- 444-449 *Genetic Thrombophilia*  
Intrauterine growth restriction and genetic predisposition to thrombophilia  
*Franca Franchi, Irene Cetin, Tullia Todros, Patrizio Antonazzo, Maria S. Nobile de Santis, Simona Cardaropoli, Paolo Bucciarelli, Eugenia Biguzzi*
- 450-461 *Stem Cell Transplantation*  
Reconstitution of T-cell compartment after *in utero* stem cell transplantation: analysis of T-cell repertoire and thymic output  
*Silvia Pirovano, Luigi Daniele Notarangelo, Fabio Malacarne, Evelina Mazzolari, Fulvio Porta, Arnalda Lanfranchi, Silvia Giliani, Sandro Zucca, Sergio Pecorelli, Alberto Albertini, Alberto G. Ugazio, Luisa Imberti*
- 462-470 *Gene Therapy*  
Efficient gene transfer into primitive hematopoietic progenitors using a bone marrow microenvironment cell line engineered to produce retroviral vectors  
*Jonathan S. Dando, Francesca Ficara, Sara Deola, Maria Grazia Roncarolo, Claudio Bordignon, Alessandro Aiuti*
- 471-479 *Novel Treatments*  
Caspase-9 is the upstream caspase activated by 8-methoxypsoralen and ultraviolet-A radiation treatment of Jurkat T leukemia cells and normal T lymphocytes  
*Alberto M. Martelli, Alessandra Cappellini, Pier Luigi Tazzari, Anna Maria Billi, Cristina Tassi, Francesca Ricci, Federica Falà, Roberto Conte*

**Decision Making & Problem Solving**

- 480-489 *Genomic Hematology*  
Molecular basis of Diamond-Blackfan anemia new findings from the Italian registry and a review of the literature  
*Maria Francesca Campagnoli, Emanuela Garelli, Paola Quarello, Adriana Carando, Stefania Varotto, Bruno Nobili, Daniela Longoni, Vanna Pecile, Marco Zecca, Carlo Dufour, Ugo Ramenghi, Irma Dianzani*

**Letters to the Editor**

- 490-492 *Disorders of Iron Metabolism*  
The impact of the C282Y and H63D mutations of the HFE gene and the Val162del mutation of the SLC11A3 gene on iron overload in Greek thalassemia intermedia and  $\beta^s/\beta^{\text{thal}}$  anemia patients  
*Marianna Politou, Vassiliki Kalotychou, Maria Pissia, Yannis Rombos, Nikos Sakellaropoulos, George Papanikolaou*
- 492-493 *Red Cell Disorders*  
Hemozoin- and 4-hydroxynonenal-mediated inhibition of erythropoiesis. Possible role in malaria dyserythropoiesis and anemia  
*Giuliana Giribaldi, Daniela Ulliers, Evelin Schwarzer, Irene Roberts, Wanda Piacibello, Paolo Aresè*

494-495	<i>Red Cell Disorders</i> Leukocyte alkaline phosphatase in <i>Plasmodium falciparum</i> malaria <i>Enrico Rino Bregani, Tu Van Tien, Mauro Pomati, Giovanni Figini, Franco Manenti</i>	503-504	<i>Thrombosis</i> Anticoagulation in the antiphospholipid syndrome <i>Patricia Casais, Maria F. Alberto, Laura C. Gennari, Silvia H. Grosso, Susana S. Meschengieser, Maria A. Lazzari</i>
495-497	<i>Acute Myeloid Leukemia</i> Molecular monitoring to identify a threshold of CBF $\beta$ /MYH11 transcript below which continuous complete remission of acute myeloid leukemia (inv16) is likely <i>Giovanni Martinelli, Michela Rondoni, Silvia Buonamici, Emanuela Ottaviani, Pier Paolo Piccaluga, Michele Malagola, Michele Baccarani</i>	504-505	<i>Thrombosis</i> Patient-specific errors in agreement between International Normalized Ratios measured by a whole blood coagulometer and by a routine plasma based method <i>Jørn Attermann, Niels T. Andersen, Helle Korsgaard, Marianne Maegaard, J. Michael Hasenkam</i>
497-499	<i>Myeloproliferative Disorders</i> Hypereosinophilic syndrome and cyclic oscillations in blood cell counts. A clonal disorder of hematopoiesis originating in a pluripotent stem cell <i>Luca Malcovati, Roberta La Starza, Serena Merante, Daniela Pietra, Cristina Mecucci, Mario Cazzola</i>	506-508	<i>Stem Cell Transplantation</i> B-cell repertoire reconstitution after hematopoietic stem cell transplantation in children evaluated by immunoglobulin heavy chain third complementarity determining region fingerprinting <i>Daniela Di Martino, Sandro Dallorso, Paola Terranova, Lucia Scarso, Giuseppe Morreale, Angelo Valetto</i>
499-501	<i>Hemostasis</i> Comparison of the diagnostic performance of three soluble fibrin monomer tests and a D-dimer assay in patients with clinically suspected deep vein thrombosis of the lower limbs. Effect of thrombus extent and anticoagulant treatment <i>Antoine Elias, Géraldine Cazanave, Françoise Nguyen, Marie Elias, Vanina Bongard, Jean-Pierre Cambus</i>		
501-502	<i>Disorders of Hemostasis</i> Molecular characterization of factor X deficiency associated to borderline plasma factor X levels <i>Mirko Pinotti, Monia Monti, Marcello Baroni, Giovanna Marchetti, Francesco Bernardi</i>		

---

### Continuing Medical Education

509	A relapsing fever
510	An infant with chronic anemia
511	A case of acute lymphoblastic leukemia
512	Genetic hemochromatosis

to find our full-text articles**

---

**Come to our website to earn Continuing Medical Education credits!**

Each month, four multiple-choice questions are presented  
both in the print journal and on the Internet.  
To participate in the monthly CME program,  
registered physicians are invited to go online to:

**[cme.haematologica.org](http://cme.haematologica.org)**
