

This Month in the Journal

- 577 Role of autoimmune gastritis, *Helicobacter pylori* and celiac disease in refractory or unexplained iron deficiency anemia
Gaetano Bergamaschi
- 577-578 FIP1L1-PDGFR α negative hypereosinophilic syndrome: not the usual suspects
Jan Cools
- 578-579 Breakpoint FISHing in leukemias with reciprocal chromosome 6 rearrangements
Oskar A. Haas
- 579 Trail decoy receptors mediate resistance of acute myeloid leukemia cells to trail
Oystein Bruslerud
- 580 Natural anti-Gal antibodies – a tool for designing novel tumor cell vaccines
Matthias Zeis
- 580-581 Molecular characterization of hemophilia B in Italy and creation of a national mutation database
Luca Malcovati, Matteo Giovanni Della Porta
- 581 Transplantation of filgrastim-mobilized peripheral blood progenitor cells versus bone marrow transplantation for treating leukemia: 3-year results from the EBMT randomized trial
Alvaro Urbano Ispizua

Editorials and Perspectives

- 582-584 The hypereosinophilic syndrome: idiopathic or not, that is the question
Jan Cools

Research Papers

- Red Cell Disorders**
- 585-595 Role of autoimmune gastritis, *Helicobacter pylori* and celiac disease in refractory or unexplained iron deficiency anemia
Chaim Hershko, A. Victor Hoffbrand, Dan Keret, Moshe Souroujov, Itzhak Maschler, Yehudit Monselise, Amnon Lahad
- Hypereosinophilic Syndrome**
- 596-601 The hypereosinophilic syndrome: fluorescence *in situ* hybridization detects the del(4)(q12)-FIP1L1/PDGFR α but not genomic rearrangements of other tyrosine kinases
Roberta La Starza, Giordina Specchia, Antonio Cuneo, Donatella Beacci, Chiara Nozzoli, Luigiana Luciano, Anna Aventin, Constantina Sambani, Nicoletta Testoni, Marco Foppol, Rosangela Invernizzi, Peter Marynen, Massimo F. Martelli, Cristina Mecucci
- Acute Leukemia**
- 602-611 Analysis of balanced rearrangements of chromosome 6 in acute leukemia: clustered breakpoints in q22-q23 and possible involvement of c-MYB in a new recurrent translocation, t(6;7)(q23;q32-36)
Paul B. Sinclair, Christine J. Harrison, Marie Jarosová, Letizia Foroni

- 612-624 **Acute Myeloid Leukemia**
TRAIL decoy receptors mediate resistance of acute myeloid leukemia cells to TRAIL
Roberta Riccioni, Luca Pasquini, Gualtiero Mariani, Ernestina Saulle, Annalisa Rossini, Daniela Diverio, Elvira Pelosi, Antonella Vitale, Anna Chierichini, Michele Cedrone, Robin Foà, Francesco Lo Coco, Cesare Peschle, Ugo Testa
- 625-634 **Malignant Lymphomas**
Anti-Gal mediated targeting of human B lymphoma cells to antigen-presenting cells: a potential method for immunotherapy with autologous tumor cells
Olivier Manches, Joel Plumas, Gabrielle Lui, Laurence Chaperot, Jean-Paul Molens, Jean-Jacques Sotto, Jean-Claude Bensa, Uri Galili
- 635-642 **Disorders of Hemostasis**
Molecular genotyping of the Italian cohort of patients with hemophilia B
Donata Belvini, Roberta Salviato, Paolo Radossi, Federica Pierobon, Piergiorgio Mori, Giuseppe Castaldo, Giuseppe Tagariello and the AICE HB study group
- 643-648 **Stem Cell Transplantation**
Transplantation of filgrastim-mobilized peripheral blood progenitor cells versus bone marrow transplantation for treating leukemia: 3-year results from the EBMT randomized trial
Norbert Schmitz, Meral Beksac, Andrea Bacigalupo, Tapani Ruutu, Arnon Nagler, Eliane Gluckman, Nigel Russell, Jane Apperley, Jeff Szer, Kenneth Bradstock, Agnes Buzyn, Brigitte Schlegelberger, James Matcham, Alois Gratwohl

Molecular Basis of Disease

- 646-660 **Thalassemia Syndrome**
Genetic modifiers of β -thalassemia
Swee Lay Thein

Decision Making and Problem Solving

- 661-671 **Malignant Lymphomas**
Cost determinants in aggressive non-Hodgkin's lymphoma
Michel van Agthoven, Pieter Sonneveld, Leo F. Verdonck, Carin A. Uyl-de Groot
- 672-677 **Thrombosis**
Treatment of superficial vein thrombosis to prevent deep vein thrombosis and pulmonary embolism: a systematic review
Iris M. Wichers, Marcello Di Nisio, Harry R. Büller, Saskia Middeldorp
- 678-684 **Thrombosis**
Implementing a venous thromboembolism prophylaxis guideline in a large Italian teaching hospital: lights and shadows
Luca Scaglione, Marina Piobbici, Eva Pagano, Luciana Ballini, Giacomo Tamponi, Giovannino Ciccone

Letters to the Editor

- 685-686 **Disorders of Iron Metabolism**
Transfusion iron overload cardiac dysfunction: lack of correlation with needle liver biopsy iron concentration
Vasili Berdoukas, Carolyn Dakin, Anthony Freeman, Ian Fraser, Athanasios Aessopos, Timothy Bohane

687-689	Red Cell Disorders Heterogeneity of molecular biology of methemoglobinemia; study of eight consecutive patients <i>Jey Maran, Yongli Guan, Ching-Nan Ou, Josef T. Prchal</i>	706-707	Multiple Myeloma CD 221 (IGF-1R) is aberrantly expressed in multiple myeloma, in relation to disease severity <i>Régis Bataille, Nelly Robillard, Hervé Avet-Loiseau, Jean-Luc Harousseau, Philippe Moreau</i>
689-691	Red Cell Disorders Low frequency of VHL gene mutation in young individuals with polycythemia and high serum erythropoietin <i>Maria Luigia Randi, Alessandra Murgia, Maria Caterina Putti, Maddalena Martella, Alberto Casarin, Giuseppe Opocher, Fabrizio Fabris</i>	707-710	Disorders of Hemostasis The mutation spectrum in Southern Spanish patients with hemophilia A. Identification of 28 novel mutations <i>Olga Fernández-López, José-Raúl García-Lozano, Ramiro Núñez-Vázquez, Rosario Pérez-Garrido, Antonio Núñez-Roldán</i>
691	Myelodysplastic Syndromes Lack of mutations of the human telomerase RNA gene (hTERC) in myelodysplastic syndromes <i>Kazuma Ohyashiki, Jerry W. Shay, Junko H. Ohyashiki</i>	710-711	Platelets Increased glycoconjugate index and normal TPO levels in idiopathic thrombocytopenic purpura patients with a decreased platelet production rate in the platelet kinetic studies <i>Ewout J. Houwerzijl, Henk Louwes, Mariet T. Esselink, Jan W. Smit, Edo Vellenga, Joost Th. M. de Wolf</i>
691-693	Myelodysplastic Syndromes Secondary myelodysplastic syndromes following treatment with azathioprine are associated with aberrations of chromosome 7 <i>Sabine Knipp, Barbara Hildebrandt, Jutta Richter, Rainer Haas, Ulrich Germing, Norbert Gattermann</i>	711-713	Thrombosis Risk of thromboembolism in patients with idiopathic autoimmune hemolytic disease and antiphospholipid antibodies: results from a prospective, case-control study <i>Velia Bongarzone, Luciana Annino, Andrea Roveda, Maria Antonietta Amendolea, Maria Cristina Tirindelli, Giuseppe Avvisati</i>
693-695	Acute Myeloid Leukemia Mismatch repair deficiency representing microsatellite instability and p53 mutations are characteristic for subgroups of acute myeloid leukemia, but independent events <i>Gerhard Herzog, Juxian Lu-Hesselmann, Yvonne Zimmermann, Torsten Haferlach, Wolfgang Hiddemann, Martin Dreyling</i>	713-715	Thrombosis The role of D-dimer and residual venous obstruction for recurrences after anticoagulation withdrawal for a first episode of venous thromboembolism in cancer patients <i>Benilde Cosmi, Cristina Legnani, Michela Cini, Giuliana Guazzaloca, Gualtiero Palareti</i>
695-696	Acute Myeloid Leukemia Limited value of FLT3 mRNA expression in the bone marrow of patients with acute myeloid leukemia for prognosis and monitoring of minimal residual disease <i>Birgit Kainz, Christa Fonatsch, Ilse Schwarzwinger, Wolfgang R. Sperr, Ulrich Jäger, Alexander Gaiger</i>	715-716	Stem Cell Transplantation A direct comparison of immunological characteristics of granulocyte colony-stimulating factor (G-CSF) primed bone marrow grafts and G-CSF-mobilized peripheral blood grafts <i>Huang Xiao Jun, Chang Ying Jun, Zhao Xiang Yu</i>
697-698	Acute Lymphoblastic Leukemia Single amino acid change a91v in the perforin gene: a novel, frequent predisposing factor to childhood acute lymphoblastic leukemia? <i>Alessandra Santoro, Sonia Cannella, Antonino Trizzino, Luca Lo Nigro, Giovanni Corsello, Maurizio Arico</i>	717-718	Transfusion Medicine Erythrocytapheresis plus erythropoietin: an alternative therapy for selected patients with hemochromatosis and severe organ damage <i>Raffaella Mariani, Sara Pelucchi, Paolo Perseghin, Chiara Corengia, Alberto Piperno</i>
698-700	Chronic Lymphoproliferative Disorders Reversal of bone marrow angiogenesis in chronic lymphocytic leukemia following fludarabine therapy <i>Stefano Molica, Angelo Vacca, Luigi Tucci, Domenico Ribatti</i>		
700-702	Malignant Lymphomas An analysis of the early and late infectious consequences of the addition of rituximab to fludarabine and cyclophosphamide in patients with indolent lymphoid malignancies <i>Constantine S. Tam, John F. Seymour, Michael Brown, Philip Campbell, John Scarlett, Craig Underhill, David Ritchie, Rodney Bond, Andrew P. Grigg</i>		
702-703	Malignant Lymphomas Preliminary observations of a phase II study of reduced-dose alemtuzumab treatment in patients with pretreated T-cell lymphoma <i>Pier Luigi Zinzani, Lapo Alinari, Monica Tani, Mariapaola Fina, Stefano Pileri, Michele Baccarani</i>		
703-705	Malignant Lymphomas The prognosis of HIV-infected patients with diffuse large B-cell lymphoma treated with cyclophosphamide, hydroxydoxorubicin, vincristine, and prednisone (CHOP), and highly active antiretroviral therapy is similar to that of HIV-negative patients receiving CHOP <i>José-Tomás Navarro, Natàlia Llovetas, Josep-Maria Ribera, Albert Oriol, José-Luis Mate, Evarist Feliu</i>		
			Continuing Medical Education
		719	Chronic eosinophilic leukemia and the hypereosinophilic syndrome
		720	Genetic modifiers of β -thalassaemia
		720	Superficial vein thrombosis
