

## This Month in the Journal

- 721 More tools to study embryonic hematopoietic stem cell emergence  
*Mervin Yoder*
- 721 Limitations of fluorescent *in situ* hybridization for analyzing fetal erythroblasts in maternal blood  
*Mahesh Choolani*
- 721-722 Screening for *NUP98* rearrangements in hematopoietic malignancies by fluorescence *in situ* hybridization  
*Christine Harrison*
- 722 6q- aberration in CD3-CD4+ T-cell clones associated with the lymphocytic variant of hypereosinophilic syndrome  
*Jan Cools*
- 722-723 Fludarabine and cytarabine as continuous sequential infusion for elderly patients with acute myeloid leukemia  
*Martin Tallman*
- 723-724 Expansion of natural killer cells for use in acute lymphoid leukemia  
*Jerome Ritz*
- 724-725 High dose sequential chemotherapy with autologous stem cell transplantation versus dose-dense outpatient chemotherapy "MegaCEOP" with G-CSF support as first line treatment in poor-prognosis diffuse large cell lymphoma  
*Michael Pfreundschuh*
- 725 Limited stage lymphoma: treatment for aggressive histologies  
*Pier Luigi Zinzani*
- 725-726 Role of the hypoxic bone marrow microenvironment in ST2MM murine myeloma tumor progression  
*S. Vincent Rajkumar*
- 726 Vascular endothelial growth factor and transforming growth factor in hereditary hemorrhagic telangiectasia  
*Domenico Ribatti*
- 727 Treating bleeding rather than platelet count in adults with autoimmune thrombocytopenic purpura  
*Marco Ruggeri*
- 727 Clues to the antithrombotic properties of parnaparin, a low molecular weight heparin  
*Debra Hoppensteadt*

## Editorials and Perspectives

- 728-732 Hereditary hemorrhagic telangiectasia  
*Jamie McDonald, Pinar Bayrak-Toydemir*
- 733 European Hematology Association educational journal

## Research Papers

- 734-739 *Hematopoietic Stem Cells*  
Multipotential hematopoietic progenitor cells from *in vitro* developed embryos engraft unconditioned  $W^{41}/W^{41}$  neonatal mice  
*Marian Peeters, Kam-Wing Ling, Aneta Oziemlak, Catherine Robin, Elaine Dzierzak*
- 740-745 *Cytogenetics*  
Numerous erythroblasts in maternal blood are impervious to FISH analysis, a feature related to a dense compact nucleus with apoptotic character  
*Tatiana Babochkina, Susanne Mergenthaler, Giuseppina De Napoli, Sashka Hristoskova, Sevgi Tercanli, Wolfgang Holzgreve, Sinuhe Hahn*
- 746-752 *Cytogenetics*  
Screening for *NUP98* rearrangements in hematopoietic malignancies by fluorescence *in situ* hybridization  
*Karin Nebral, Margit König, Helmut H. Schmidt, Dieter Lutz, Wolfgang R. Sperr, Krzysztof Kalwak, Stefan Brugger, Michael N. Dworzak, Oskar A. Haas, Sabine Strehl*
- 753-765 *Cytogenetics*  
6q- is an early and persistent chromosomal aberration in CD3 CD4+ T cell clones associated with the lymphocytic variant of hypereosinophilic syndrome  
*Marie Ravoet, Catherine Sibille, Florence Roufosse, Hugues Duwillier, Christos Sotiriou, Liliane Schandené, Philippe Martiat, Michel Goldman, Karen E. Willard-Gallo*
- 766-775 *Leukemogenesis*  
Establishment and characterization of a new human acute monocytic leukemia cell line SHI-1 having t(6;11)(q27;q23), p53 gene alterations and high tumorigenicity in nude mice  
*Suning Chen, Yongquan Xue, Xueguang Zhang, Yafang Wu, Jinlan Pan, Yong Wang, Jiannong Ceng*
- 776-784 *Acute Myeloid Leukemia*  
Fludarabine and cytarabine as continuous sequential infusion for elderly patients with acute myeloid leukemia  
*Felicetto Ferrara, Alfonso M. D'Arco, Mariacarla De Simone, Giuseppina Mele, Catello Califano, Barbara Pocali, Paolo Danise, Salvatore Palmieri*
- 785-792 *Acute Lymphoblastic Leukemia*  
Expansion of natural killer cells with lytic activity against autologous blasts from adult and pediatric acute lymphoid leukemia patients in complete hematologic remission  
*Giovanni F. Torelli, Anna Guarini, Roberta Maggio, Cecilia Alfieri, Antonella Vitale, Robin Foà*
- 793-801 *Malignant Lymphomas*  
High dose sequential chemotherapy with autologous transplantation versus dose-dense chemotherapy MegaCEOP as first line treatment in poor-prognosis diffuse large cell lymphoma: an "Intergruppo Italiano Linfomi" randomized trial  
*Umberto Vitolo, Anna Marina Liberati, Maria Giuseppina Cabras, Massimo Federico, Emanuele Angelucci, Luca Baldini, Carola Boccimini, Maura Brugiatelli, Roberta Calvi, Giovannino Ciccone, Angelo Genua, Giorgio Lambertenghi Delileri, Alessandro Levis, Guido Parvis, Enzo Pavone, Flavia Salvi, Marco Sborgia, Eugenio Gallo*  
*on behalf of the Intergruppo Italiano Linfomi*

- Malignant Lymphomas**  
802-809 Long-term outcome of localized high-grade non-Hodgkin's lymphoma treated with high dose CHOP regimen and involved field radiotherapy  
*Marc Bernard, Guillaume Cartron, Petronella Rachieru, Annick LeMevel, Bernard Branger, Catherine Le Maignan, Christian Berthou, Christiane Ghandour, Vincent Delwail, Noel Milpied, Philippe Cassasus, Philippe Solal Celigny, Dominique Guyotat, Thierry Lamy, Bernard Desablens on behalf of the French GOELAMS group*
- Multiple Myeloma**  
810-817 Role of the hypoxic bone marrow microenvironment in 5T2MM murine myeloma tumor progression  
*Keval Asosingh, Hendrik De Raeve, Mark de Ridder, Guy A. Storme, Angelo Willems, Ivan Van Riet, Benjamin Van Camp, Karin Vanderkerken*
- Disorders of Hemostasis**  
818-828 Patients with hereditary hemorrhagic telangiectasia show increased plasma levels of vascular endothelial growth factor and TGF- $\beta$ 1 as well as high ALK1 tissue expression  
*Haneen Sadick, Frank Riedel, Ramin Naim, Ulrich Gössler, Karl Hörmann, Mathias Hafner, Andreas Lux*
- Platelets**  
829-832 Assessment of a therapeutic strategy for adults with severe autoimmune thrombocytopenic purpura based on a bleeding score rather than platelet count  
*Mehdi Khellaf, Marc Michel, Annette Schaeffer, Philippe Bierling, Bertrand Godeau*
- Thrombosis**  
833-839 Prevention of platelet-PMN leukocyte interaction: new clues to the antithrombotic properties of parnaparin, a low molecular weight heparin  
*Norma Maugeri, Giovanni de Gaetano, Miriam Barbanti, Maria Benedetta Donati, Chiara Cerletti*

## Decision Making and Problem Solving

- Acute Myeloid Leukemia**  
840-845 Standard practice and controversial issues in front-line therapy of acute promyelocytic leukemia  
*Miguel A. Sanz, Francesco Lo Coco*
- Disorders of Hemostasis**  
846-850 Hepatitis C and health-related quality of life among patients with hemophilia  
*Dirk Posthouwer, Iris Plug, Johanna G. van der Bom, Kathelijn Fischer, Frits R. Rosendaal, Eveline P. Mauser-Bunschoten*

## Letters to the Editor

- Myeloproliferative disorders**  
851-853 Thrombotic and bleeding complications in four subpopulations of patients with ET defined by *c-Mpl* protein expression and PRV-1 mRNA levels  
*Philipp S. Goertler, Edith März, Peter L. Johansson, Björn Andreasson, Jack Kutti, Alison R. Moliterno, Roberto Marchioli, Jerry L. Spivak, Heike L. Pahl*
- Acute Myeloid Leukemia**  
853-854 Mutations of *PTPN11* are rare in adult myeloid malignancies  
*Hugues Leroy, Hélène Cavé, Nathalie Philippe, Sabrina Pereira, Pierre Fenaux, Claude Preudhomme*
- Malignant Lymphomas**  
854-856 The relative levels of cyclin D1 (a) and (b) alternate transcripts in mantle cell lymphoma may depend more on the sample origin than on *CCND1* gene polymorphism  
*Nathalie Carrère, Marc-Antoine Belaud-Rotureau, Pierre Dubus, Marie Parrens, Antoine de Mascarel, Jean-Philippe Merlio*
- Malignant Lymphomas**  
856-858 Rituximab mono-therapy for splenic marginal zone lymphoma  
*Michael Bennett, Kumud Sharma, Shai Yegena, Israel Gavish, Harish P. Dave, Geraldine P. Schechter*
- Multiple Myeloma**  
858-860 Correlation between fatigue and hemoglobin level in multiple myeloma patients: results of a cross-sectional study  
*Antonio Palumbo, Maria Teresa Petrucci, Vito Michele Lauta, Pellegrino Musto, Tommaso Caravita, Anna Maria Barbui, Martina Nunzi, Mario Boccadoro*
- Platelets**  
860-861 Retrospective analysis of 472 Chinese children with chronic idiopathic thrombocytopenic purpura: a single center experience  
*Hui Zhao, Hongqiang Li, Lei Zhang, Tingting Wang, Linxiang Ji, Renchi Yang*
- Stem Cell Transplantation**  
861-862 Bortezomib treatment followed by second non-myeloablative allogeneic stem cell transplantation for multiple myeloma relapse and progression after autologous and non-myeloablative allogeneic stem cell transplantation combination  
*Daniele Mattei, Nicola Mordini, Riccardo Vigna Taglianti, Benedetto Bruno, Davide Rapezzi, Andrea Gallamini*

## Continuing Medical Education

- 863 Hepatitis C and health-related quality of life among patients with hemophilia
- 864 Hereditary hemorrhagic telangiectasia
- 864 Treatment of acute promyelocytic leukemia
