

Editorials and Perspectives

- 721-723 Pyruvate kinase deficiency
Alberto Zanella, Paola Bianchi, Elisa Fermo
- 723-727 The spectrum of molecular aberrations in myelodysplastic syndromes: in the shadow of acute myeloid leukemia
David P. Steensma
- 728-730 Myeloproliferative disorders: let the partner guide!
Olivier Rosnet, Daniel Birnbaum

Research Papers

Red Cell Disorders

- 731-737 Transgenic rescue of hemolytic anemia due to red blood cell pyruvate kinase deficiency
Hitoshi Kanno, Taiju Utsugisawa, Shin Aizawa, Tsutomu Koizumi, Ken-ichi Aisaki, Takako Hamada, Hiromi Ogura, Hisaichi Fujii

Red Cell Disorders

- 738-743 Pulmonary hypertension in patients with sickle cell/ β thalassemia: incidence and correlation with serum N-terminal pro-brain natriuretic peptide (NT-proBNP) concentrations
Ersi Voskaridou, George Tsetsos, Antonios Tsoutsias, Evgenia Spyropoulou, Dimitrios Christoulas, Evangelos Terpos

Acute Myeloid Leukemia

- 744-752 A comparative study of molecular mutations in 381 patients with myelodysplastic syndrome and in 4130 patients with acute myeloid leukemia
Ulrike Bacher, Torsten Haferlach, Wolfgang Kern, Claudia Haferlach, Susanne Schnittger

Acute Myeloid Leukemia

- 753-762 Arsenic trioxide induces accumulation of cytotoxic levels of ceramide in acute promyelocytic leukemia and adult T-cell leukemia/lymphoma cells through *de novo* ceramide synthesis and inhibition of glucosylceramide synthase activity
Ghassan S. Dbaibo, Youmna Kfoury, Nadine Darwiche, Shoghag Panjarian, Lina Kozhaya, Rihab Nasr, Mazen Abdallah, Olivier Hermine, Marwan El-Sabban, Hugues de Thé, Ali Bazarbachi

Acute Myeloid Leukemia

- 763-770 Prognosis of acute myeloid leukemia patients up to 60 years of age exhibiting trisomy 8 within a non-complex karyotype: individual patient data-based meta-analysis of the German Acute Myeloid Leukemia Intergroup
Markus Schaich, Richard F. Schlenk, Haifa K. Al-Ali, Hartmut Döhner, Arnold Ganser, Gerhard Heil, Thomas Illmer, Rainer Krabl, Jürgen Krauter, Cristina Sauerland, Thomas Büchner, Gerhard Ehninger

Malignant Lymphomas

- 771-777 Histological verification of positive positron emission tomography in the follow-up of mediastinal lymphoma patients
Pier Luigi Zinzani, Monica Tani, Rocco Trisolini, Stefano Fanti, Vittorio Stefoni, Marco Alifano, Paolo Castellucci, Gerardo Musuraca, Giorgia Dalpiaz, Lapo Alinari, Enrica Marchi, Mariapaola Fina, Cinzia Pellegrini, Mohsen Farsad, Alessandra Cancellieri, Annalisa Busca, Romeo Canini, Stefano Pileri, Michele Baccarani, Maurizio Boaron

Malignant Lymphomas

- 778-783 Respective prognostic value of germinal center phenotype and early 18 F-fluorodeoxyglucose-PET scanning in previously untreated diffuse large B-cell lymphoma
Jehan Dupuis, Philippe Gaulard, Francois Hemery, Emmanuel Itti, Christian Gisselbrecht, Alain Rahmouni, Christiane Copie-Bergman, Josette Brière, Taoufik El Gnaoui, Isabelle Gaillard, Michel Meignan, Corinne Haioun

Malignant Lymphomas

- 784-794 Low-dose intermittent alemtuzumab in the treatment of Sézary syndrome: clinical and immunologic findings in 14 patients
Maria Grazia Bernengo, Pietro Quaglino, Alessandra Comessatti, Michela Ortoncelli, Mauro Novelli, Francesco Lisa, Maria Teresa Fierro

Multiple Myeloma

- 795-802 Multiple myeloma primary cells show a highly rearranged unbalanced genome with amplifications and homozygous deletions irrespective of the presence of immunoglobulin-related chromosometranslocations
Cristina Largo, Borja Saéz, Sara Alvarez, Javier Suela, Bibiana Ferreira, David Blesa, Felipe Prosper, M. Jose Calasanz, Juan C. Cigudosa

- Multiple Myeloma**
803-811 TACI expression is associated with a mature bone marrow plasma cell signature and C-MAF overexpression in human myeloma cell lines
Jérôme Moreaux, Dirk Hose, Michel Jourdan, Thierry Reme, Michael Hundemer, Marion Moos, Nicolas Robert, Philippe Moine, John De Vos, Hartmut Goldschmidt, Bernard Klein

- Thrombosis & Hemostasis**
812-818 Endothelial dysfunction in patients with spontaneous venous thromboembolism
Rino Migliacci, Cecilia Becattini, Raffaele Pesavento, Giovanni Davi, Maria Cristina Vedovati, Giuseppe Guglielmini, Emanuela Falcinelli, Giovanni Ciabattini, Fabio Dalla Valle, Paolo Prandoni, Giancarlo Agnelli, Paolo Gresele

- Stem Cell Transplantation**
819-825 Retrospective evaluation of serum Epstein Barr virus DNA levels in 406 allogeneic stem cell transplant patients
Eeva Juvonen, Sanna Aalto, Jussi Tarkkanen, Liisa Volin, Klaus Hedman, Tapani Ruutu

Progress in Hematology

- Malignant Lymphomas**
826-833 Rituximab maintenance therapy: a step forward in follicular lymphoma
Marinus H.J. van Oers

Brief Reports

- Chronic Myeloid Leukemia**
834-837 Dynamics of cytogenetic aberrations in Philadelphia chromosome positive and negative hematopoiesis during dasatinib therapy of chronic myeloid leukemia patients after imatinib failure
Alice Fabarius, Claudia Haferlach, Martin C. Müller, Philipp Erben, Tanja Labaye, Michelle Giehl, Oliver Frank, Wolfgang Seifarth, Rüdiger Hehlmann, Andreas Hochhaus

- Chronic Myeloid Leukemia**
838-841 Enhanced Bcr-Abl-Specific antileukemic activity of arsenic trioxide through glutathione-depletion in imatinib-resistant cells
Heiko König, Nicolai Härtel, Beate Schultheis, Michael Schatz, Christian Lorentz, Junia V. Melo, Rüdiger Hehlmann, Andreas Hochhaus, Paul La Rosée

- Disorders of Hemostasis**
842-845 Sixteen novel hemophilia A causative mutations in the first Argentinean series of severe molecular defects
Liliana C. Rossetti, Claudia Pamela Radic, Miguel Candela, Raúl Pérez Bianco, Miguel de Tezanos Pinto, Anne Goodeve, Irene B. Larripa, Carlos D. De Brasi

- Disorders of Hemostasis**
846-849 Cryoprecipitate versus commercial fibrinogen concentrate in patients who occasionally require a therapeutic supply of fibrinogen: risk comparison in the case of an emerging transfusion-transmitted infection
Arturo Pereira

- Stem Cell Transplantation**
850-853 Quantification by magnetic resonance imaging and liver consequences of post-transfusion iron overload alone in long term survivors after allogeneic hematopoietic stem cell transplantation
Christian Rose, Olivier Ernst, Bernard Hecquet, Patrice Maboudou, Pascale Renom, Marie Pierre Noel, Ibrahim Yakoub-Agha, Francis Bauters, Jean Pierre Jouet

Letters to the Editor

- Red Cell Disorders**
854 Effectiveness of a dedicated day hospital for management of acute sickle cell pain
Adeboye H. Adewoye, Vikki Nolan, Lillian McMahon, Qianli Ma, Martin H Steinberg

- Red Cell Disorders**
855-856 Aberrant positivity for CD79a in erythroid lineage cells – a finding observed in a subset of re-staging bone marrow trephine biopsies after treatment
Rashpal Singh Flora, Finella Brito-Babapulle, Kikkeri N. Naresh

Disorders of Iron Metabolism

- 857-858 Anti-interleukin 6 receptor antibody tocilizumab reduces the level of serum hepcidin in patients with multicentric Castleman's disease
Hiroshi Kawabata, Naohisa Tomosugi, Junya Kanda, Yasuhiro Tanaka, Kazuyuki Yoshizaki, Takashi Uchiyama

Myelodysplastic Syndromes

- 859-860 A simple method for detection of major phenotypic abnormalities in myelodysplastic syndromes: expression of CD56 in CMML
Charlotte Lacronique-Gazaille, Marie-Pierre Chaury, Alexandre le Guyader, Jean-Luc Faucher, Dominique Bordessoule, Jean Feuillard

Acute Myeloid Leukemia

- 861-862 AML1 mutation and its coexistence with different transcription factor gene families in *de novo* acute myeloid leukemia: redundancy or synergism
Chirayu U Auewarakul, Amporn Leecharendkeat, Chintana Tocharoentanaphol, Orathai Promsuwicha, Narongrit Sritana, Wanna Thongnoppakhun

Malignant Lymphomas

- 863-864 Deregulated over expression of *FOXP1* protein in diffuse large B-cell lymphoma does not occur as a result of gene rearrangement
Sharon L. Barrans, James A.L. Fenton, Roland Ventura, Alex Smith, Alison H. Banham, Andrew S. Jack

Continuing Medical Education

Molecular mutations in myelodysplastic syndrome and acute myeloid leukemia

Alemtuzumab in the treatment of Sézary syndrome

Rituximab maintenance therapy: a step forward in follicular lymphoma

Pulmonary hypertension in patients with sickle cell/ β thalassemia: incidence and correlation with serum N-terminal pro-brain natriuretic peptide concentrations
