Volume 99, Issue 10: October 2014

Cover Figure
Balancing cell differentiation in the hematopoietic system – image accompanying the article by Zeddies et al. (page 1555). (image created by www.somersault1824.com)

Editorials & Perspectives
1533 Should clinical hematologists put their microscopes on eBay?
Mars van’t Veer, et al.

1534 Disease severity in chronic graft-versus-host disease: doctors’ gut feeling versus biostatistics?
Gerard Socié

1536 Stem cell transplants for myelodysplastic syndromes: refining the outcome predictions
Austin John Barrett

Review Articles
1538 Three major uncertainties in the antibody therapy of cancer
George T. Stevenson

1547 Treatment of autoimmune hemolytic anemias
Alberto Zanella, et al.

Articles
Hematopoiesis
1555 MEIS1 regulates early erythroid and megakaryocytic cell fate
Sabrina Zeddies, et al.
This article has a graphical abstract

1565 Krüppel-like transcription factors KLF1 and KLF2 have unique and coordinate roles in regulating embryonic erythroid precursor maturation
Divya S. Vinjamur, et al.

Bone Marrow Failure
1574 Outcome of aplastic anemia in adolescence: a survey of the Severe Aplastic Anemia Working Party of the European Group for Blood and Marrow Transplantation
Carlo Dufour, et al.

Myelodysplastic Syndromes
1582 Impact of the International Prognostic Scoring System cytogenetic risk groups on the outcome of patients with primary myelodysplastic syndromes undergoing allogeneic stem cell transplantation from human leukocyte antigen-identical siblings: a retrospective analysis of the European Society for Blood and Marrow Transplantation-Chronic Malignancies Working Party
Francesco Onida, et al.
Read the accompanying editorial on page 1536
This article has a graphical abstract
Acute Lymphoblastic Leukemia
1591 The Sox4/Tcf7l1 axis promotes progression of BCR-ABL-positive acute lymphoblastic leukemia
Haiqing Ma, et al.

Chronic Lymphocytic Leukemia
1599 Chronic lymphocytic leukemia in the elderly: clinico-biological features, outcomes, and proposal of a prognostic model
Tycho Baumann, et al.

Plasma Cell Disorders
1605 The bone marrow of myeloma patients is steadily inhabited by a normal-sized pool of functional regulatory T cells irrespective of the disease status
Myriam Foglietta, et al.
1611 Chromosome 1 abnormalities in elderly patients with newly diagnosed multiple myeloma treated with novel therapies
Simona Caltagirone, et al.

Stem Cell Transplantation
1618 Association of severity of organ involvement with mortality and recurrent malignancy in patients with chronic graft-versus-host disease
Yoshihiro Inamoto, et al.

1624 A randomized phase II trial of tacrolimus, mycophenolate mofetil and sirolimus after non-myeloablative unrelated donor transplantation
Brian Kornblit, et al.

1632 Phase IV open-label study of the efficacy and safety of deferasirox after allogeneic stem cell transplantation
Carlos Vallejo, et al.

Coagulation & its Disorders
1638 Evaluation of mean platelet volume as a predictive marker for cancer-associated venous thromboembolism during chemotherapy
Patrizia Ferroni, et al.

Letters to the Editor
Letters are available online only at www.haematologica.org/content/99/10.toc

e176 ETV6 mutation in a cohort of 970 patients with hematologic malignancies
Qinrong Wang, et al.
http://www.haematologica.org/content/99/10/e176

e179 Response to azacitidine is independent of p53 expression in higher-risk myelodysplastic syndromes and secondary acute myeloid leukemia
Catharina Müller-Thomas, et al.
http://www.haematologica.org/content/99/10/e179

e182 Clinical importance of different calreticulin gene mutation types in wild-type JAK2 essential thrombocythemia and myelofibrosis patients
Chun Qiao, et al.
http://www.haematologica.org/content/99/10/e182
e185 Anthracycline dose intensification improves molecular response and outcome of patients treated for core binding factor acute myeloid leukemia
Thomas Prebet, et al.
http://www.haematologica.org/content/99/10/e185

e188 The activating STAT5B N642H mutation is a common abnormality in pediatric T-cell acute lymphoblastic leukemia and confers a higher risk of relapse
Obul R. Bandapalli, et al.
http://www.haematologica.org/content/99/10/e188

e193 Risk of esophageal cancer following radiotherapy for Hodgkin lymphoma
Lindsay M. Morton, et al.
http://www.haematologica.org/content/99/10/e193

e197 A restricted IGHV gene repertoire in splenic marginal zone lymphoma is associated with autoimmune disorders
Gabriel Brisou, et al.
http://www.haematologica.org/content/99/10/e197

e199 Sequential treatment for allogeneic hematopoietic stem cell transplantation in Fanconi anemia with acute myeloid leukemia
Alexis Talbot, et al.
http://www.haematologica.org/content/99/10/e199

e201 Erythrocytosis associated with a novel missense mutation in the BPGM gene
Nayia Petousi, et al.
http://www.haematologica.org/content/99/10/e201

e205 Mice over-expressing human erythropoietin indicate that erythropoietin enhances expression of its receptor via up-regulated Gata1 and Tal1
Philipp Deindl, et al.
http://www.haematologica.org/content/99/10/e205

e208 NFE2 regulates transcription of multiple enzymes in the heme biosynthesis pathway
Lara Rheinemann, et al.
http://www.haematologica.org/content/99/10/e208

e211 Contribution of ADAMTS13 to the better cell engraftment efficacy in mouse model of bone marrow transplantation
Hideto Matsui, et al.
http://www.haematologica.org/content/99/10/e211
