Editorials
1769 Smoldering multiple myeloma: special considerations surrounding treatment on versus off clinical trials
Elisabet E Manasanch, et al.

Review Articles
1772 Epigenetics in the hematologic malignancies
Chun Yew Fong, et al.

Articles
Bone Marrow Failure
1784 First-line treatment for severe aplastic anemia in children: bone marrow transplantation from a matched family donor versus immunosuppressive therapy
Nao Yoshida, et al.

1792 Gene therapy cures the anemia and lethal bone marrow failure in a mouse model of RPS19-deficient Diamond-Blackfan anemia
Pekka Jaako, et al.

Acute Myeloid Leukemia
1799 The N-terminal CEBPA mutant in acute myeloid leukemia impairs CXCR4 expression
Yuan-Yeh Kuo, et al.

This article has a graphical abstract

Acute Lymphoblastic Leukemia
1808 The Notch-driven long non-coding RNA repertoire in T-cell acute lymphoblastic leukemia
Kaat Durinck, et al.

Non-Hodgkin Lymphoma
1817 Prognostic significance of pleural or pericardial effusion and the implication of optimal treatment in primary mediastinal large B-cell lymphoma: a multicenter retrospective study in Japan
Tomohiro Aoki, et al.

1826 Detection of monoclonal T populations in patients with KIR-restricted chronic lymphoproliferative disorder of NK cells
Cristina Gattazzo, et al.
1834 Critical role of SHP2 (PTPN11) signaling in germinal center-derived lymphoma
   Xin Jiang, et al.

Plasma Cell Disorders
1846 Secondary monoclonal gammopathy of undetermined significance after allogeneic stem cell transplantation in multiple myeloma
   Marian F. Schmitz, et al.

Cell Therapy & Immunotherapy
1854 Identification of minor histocompatibility antigens based on the 1000 Genomes Project
   Rimke Oostvogels, et al.
   ➔ This article has a graphical abstract

Stem Cell Transplantation
1860 Favorable impact of natural killer cell reconstitution on chronic graft-versus-host disease and cytomegalovirus reactivation after allogeneic hematopoietic stem cell transplantation
   Vissal David Kheav, et al.
   ➔ This article has a graphical abstract

1868 Myelodysplastic syndrome evolving from aplastic anemia treated with immunosuppressive therapy: efficacy of hematopoietic stem cell transplantation
   Sung-Yong Kim, et al.

Iron Metabolism & its Disorders
1876 Iron overload causes osteoporosis in thalassemia major patients through interaction with transient receptor potential vanilloid type 1 (TRPV1) channels
   Francesca Rossi, et al.
   ➔ This article has a graphical abstract

Letters to the Editor
Letters are available online only at www.hematologica.org/content/99/12.toc

   e244 Specific molecular mutation patterns delineate chronic neutrophilic leukemia, atypical chronic myeloid leukemia, and chronic myelomonocytic leukemia
   Manja Meggendorfer, et al.
   http://www.hematologica.org/content/99/12/e244

   e247 Induction of short-term remission with single agent eltrombopag in refractory nucleophosmin-1-mutated acute myeloid leukemia
   Uwe Platzbecker, et al.
   http://www.hematologica.org/content/99/12/e247

   e249 Minimal residual disease detection in cryopreserved ovarian tissue by multicolor flow cytometry in acute myeloid leukemia
   Tristan Zver, et al.
   http://www.hematologica.org/content/99/12/e249
e253 The truncated RUNX1/ETO activates VLA-4-dependent adhesion and migration of hematopoietic progenitor cells
Kanagaraju Ponnusamy, et al.
http://www.haematologica.org/content/99/12/e253

e257 High expression of transcription factor 4 (TCF4) is an independent adverse prognostic factor in acute myeloid leukemia that could
guide treatment decisions
Florentien E.M. in ’t Hout, et al.
http://www.haematologica.org/content/99/12/e257

e260 Stringent patient selection improves outcomes in systemic light-chain amyloidosis after autologous stem cell transplantation
in the upfront and relapsed setting
Christopher P. Venner, et al.
http://www.haematologica.org/content/99/12/e260

e264 Granulocyte colony-stimulating factor combined regimen in cord blood transplantation for acute myeloid leukemia: a nationwide
retrospective analysis in Japan
Takaaki Konuma, et al.
http://www.haematologica.org/content/99/12/e264
