**Table of Contents**

Volume 99, Issue 8: August 2014

**Cover Figure**

Artistic impression of microRNAs in hematology – image accompanying the article on the oncomir microRNA-128-3p. (image created by www.somersault1824.com)

**Editorials & Perspectives**

1273  Cancer survivorship programs: time for concerted action  
Tiziano Barbui, et al.

**Review Articles**

1277  Targeting acute myeloid leukemia stem cells: a review and principles for the development of clinical trials  
Daniel A. Pollyea, et al.

**Guideline Articles**

1285  MDM2 promoter polymorphism and disease characteristics in chronic lymphocytic leukemia: results of an individual patient data-based meta-analysis  
Axel Benner, et al.

**Articles**

**Hematopoiesis & Hematopoietic Stem Cells**

1292  Sin3a-associated Hdac1 and Hdac2 are essential for hematopoietic stem cell homeostasis and contribute differentially to hematopoiesis  
Marinus R. Heideman, et al.  
→ This article has a graphical abstract

**Thalassemia Syndromes**

1304  Therapeutic effects of induced pluripotent stem cells in chimeric mice with β-thalassemia  
Guanheng Yang, et al.

**Aplastic Anemia**

1312  Peripheral blood lymphocyte telomere length as a predictor of response to immunosuppressive therapy in childhood aplastic anemia  
Hirotoshi Sakaguchi, et al.

**Acute Myeloid Leukemia**

1317  Molecular response assessment by quantitative real-time polymerase chain reaction after induction therapy in NPM1-mutated patients identifies those at high risk of relapse  
Max Hubmann, et al.  
→ This article has a graphical abstract

**Acute Lymphoblastic Leukemia**

1326  MicroRNA-128-3p is a novel oncomiR targeting PHF6 in T-cell acute lymphoblastic leukemia  
Evelien Mets, et al.  
→ This article has a graphical abstract
IGH@ translocations co-exist with other primary rearrangements in B-cell precursor acute lymphoblastic leukemia
Sally J. Jeffries, et al.

Non-Hodgkin Lymphoma
R-CHOP with or without bevacizumab in patients with previously untreated diffuse large B-cell lymphoma: final MAIN study outcomes
John F. Seymour, et al.

Chronic Lymphocytic Leukemia
Outcomes of first-line treatment for chronic lymphocytic leukemia with 17p deletion
Paolo Strati, et al.

Lymphoproliferative Disorders
SIGLEC-G deficiency increases susceptibility to develop B-cell lymphoproliferative disorders
Giorgia Simonetti, et al.

Multiple Myeloma
Transcriptome analysis reveals molecular profiles associated with evolving steps of monoclonal gammapathies
Lucía López-Corral, et al.

Stem Cell Transplantation
Geriatric assessment to predict survival in older allogeneic hematopoietic cell transplantation recipients
Lori S. Muffly, et al.

Intravenous busulfan for autologous stem cell transplantation in adult patients with acute myeloid leukemia: a survey of 952 patients on behalf of the Acute Leukemia Working Party of the European Group for Blood and Marrow Transplantation
Arnon Nagler, et al.

Platelet Disorders
Analysis of 339 pregnancies in 181 women with 13 different forms of inherited thrombocytopenia
Patrizia Noris, et al.

Congenital Neutropenia
Outcome and management of pregnancies in severe chronic neutropenia patients by the European Branch of the Severe Chronic Neutropenia International Registry
Cornelia Zeidler, et al.

Errata Corrige
Attenuated measles virus controls pediatric acute B-lineage lymphoblastic leukemia in NOD/SCID mice
Nike C. Lühl, et al.

Letters to the Editor
Letters are available online only at www.hematologica.org/content/99/8/toc

Infants with acute myeloid leukemia treated according to the Associazione Italiana di Ematologia e Oncologia Pediatrica 2002/01 protocol have an outcome comparable to that of older children
Riccardo Masetti, et al.
http://www.hematologica.org/content/99/8/e127
e130  Mapping epigenetic regulator gene mutations in cytogenetically normal pediatric acute myeloid leukemia
Daria G. Valerio, et al.
http://www.haematologica.org/content/99/8/e130

e133  Genome-wide genotyping of acute myeloid leukemia with translocation t(9;11)(p22;q23) reveals novel recurrent genomic alterations
Michael W.M. Kühn, et al.
http://www.haematologica.org/content/99/8/e133

e136  Adrenal insufficiency during treatment for childhood acute lymphoblastic leukemia is associated with glucocorticoid receptor polymorphisms ER22/23EK and Bcl
Ruben D. de Ruiter, et al.
http://www.haematologica.org/content/99/8/e136

e138  Risk-adapted high-dose and dose-dense therapies modulate the impact of biological classification in diffuse large B-cell lymphoma prognosis
Santiago Montes-Moreno, et al.
http://www.haematologica.org/content/99/8/e138

e142  No evidence of hypermutability in red cells from patients with paroxysmal nocturnal hemoglobinuria using the XK gene
David J. Araten, et al.
http://www.haematologica.org/content/99/8/e142

e145  The challenge of cross-trial comparisons using limited data
Jacob P. Laubach, et al.
http://www.haematologica.org/content/99/8/e145

e147  Reply to “The challenge of cross-trial comparison using limited data” Haematologica. 2014;99(8):e145
David S. Siegel
http://www.haematologica.org/content/99/8/e147
