Manuscript no. HAEMATOL/2010/027102 entitled "Inconsistency of different methods assessing ex vivo platelet function: relevance for the detection of aspirin resistance"

Authors: Giulia Renda, MD, PhD, Maria Zurro, PhD, Gelsomina Malatesta, MD, Benedetta Ruggieri, MD, and Raffaele De Caterina, MD, PhD.

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
• Raffaele De Caterina, MD, PhD, Corresponding author - E-mail: rdecater@unich.it

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ......................... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Giulia Renda and Raffaele De Caterina

3) Design & Methods. The following authors were responsible for specific investigations
• Giulia Renda, Maria Zurro, Benedetta Ruggieri and Gelsomina Malatesta were responsible for the performance of platelet function studies
• Raffaele De Caterina and Giulia Renda contributed both to the study design

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:
• All coauthors contributed to data acquisition - Giulia Renda and Raffaele De Caterina revised results and drafted figures and tables

5) Writing the manuscript. The following authors were responsible for writing the manuscript:
• Giulia Renda and Raffaele De Caterina

6) Contributors Listed in Acknowledgments: None
