Manuscript no. HAEMATOL/2011/048694 Entitled "A role for activated endothelial cells in red blood cell clearance: implications for vasopathology"

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
   • Marcel H.A.M. Fens, University Medical Center Utrecht, mfens@umcutrecht.nl
   • Wouter W. van Solinge, University Medical Center Utrecht, w.w.vansolinge@umcutrecht.nl

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 …………………. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Marcel Fens, Richard van Wijk, Raymond Schiffelers, Carlo Gaillard and Wouter van Solinge

3) Design & Methods. The following authors were responsible for specific investigations (please detail):
   • Marcel Fens, Grietje Andringa, Karlijn van Rooijen, Hilde Dijstelbloem and Karen de Vooght were responsible for RBC characterization experiments
   • Marcel Fens, Grietje Andringa, and Jan Rasmussen were responsible for lactadherin mediated erythrophagocytosis experiments
   • Marcel Fens and Grietje Andringa were responsible for the imaging and cytotoxicity experiments

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):
   • Marcel Fens, Grietje Andringa were responsible for all experiments, figures and tables (figs 1-6 + supplemental and table 1+2)
   • Karlijn van Rooijen and Hilde Dijstelbloem and Karen de Vooght were responsible for the RBC characterization experiments (fig 1+2 and table 1+2)
   • Jan Rasmussen was responsible for the lactadherin mediated erythrophagocytosis experiments (fig 3, 4 and 5)

5) Writing the manuscript. The following authors were responsible for writing the manuscript:
   • Marcel Fens, Richard van Wijk, Raymond Schiffelers, Carlo Gaillard and Wouter van Solinge were responsible for writing the manuscript
6) Contributors Listed in Acknowledgments:
We would like to thank Dr. Max R. Hardeman for excellent assistance with the LORCA deformability experiments and Silvie A.E. Sebastian for excellent technical assistance with the perfusion experiments. We did not have assistance with the study design, data collection, data analysis, or manuscript preparation.
