Manuscript no. HAEMATOL/2011/043125 entitled “Characterization of potential CD138 negative myeloma “stem cells””.

Authors: Jacob H. Christensen, Pia V. Jensen, Ida B. Kristensen, Niels Abildgaard, Marianne Lodahl and Thomas Rasmussen

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:  
• Jacob H Christensen, Department of Hematology, Odense University Hospital, Odense, Denmark

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ……………………… Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Jacob H. Christensen, Pia V. Jensen, Thomas Rasmussen

3) Design & Methods. The following authors were responsible for specific investigations  
• Jacob H. Christensen responsible for flowcytometry and acquisition of data  
• Pia V. Jensen responsible for flowcytometry and acquisition of data  
• Ida B. Kristensen responsible for flowcytometry and acquisition of data  
• Thomas Rasmussen & Niels Abildgaard responsible for general supervision  
• Marianne Lodahl responsible for collection of data and laboratory work.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:  
• Ida B. Kristensen is responsible for figures and flowcytometry results.  
• Thomas Rasmussen and Marianne Lodahl are responsible for PCR-data.  
• Pia V. Jensen is responsible for microscopy images  
• Jacob H. Christensen is responsible for flowcytometry data

5) Writing the manuscript. The following authors were responsible for writing the manuscript:  
• Jacob H. Christensen and Niels Abildgaard are responsible for writing the manuscript.

6) Contributors Listed in Acknowledgments: no contributors are listed in acknowledgments
