Title	First description of the t(10;11)(q22;q23)/ <i>MLL-TET1</i> translocation in a T-cell lymphoblastic lymphoma, with subsequent lineage switch to acute myelomonocytic myeloid leukemia
First author	<i>Antoine Ittel</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

Antoine Ittel: cytogenetics study, interpretation of data, generation of figures, collection of images, preparation and review of the manuscript (responsible of cytogenetics study)

Eric Jeandidier: cytogenetics study, interpretation of data, generation of figures, collection of images, preparation

Catherine Helias: cytogenetics study, interpretation of data

Nathalie Perrusson: molecular analyses, (responsible of molecular biology experiments)

Catherine Humbrecht: clinical support of the patient (T-ALL), data collection, interpretation of data, preparation of the text

Bruno Lioure: clinical support of the patient (bone marrow allograft), data collection;

Isabelle Mazurier: biological data generation and collection (responsible of the biology of T-ALL)

Caroline Mayeur-Rousse biological data generation, interpretation and collection of data, image generation (responsible of the biology of AML)

Amandine Lavaux: cytogenetics study of the T-ALL

Sylvie Thiebault: pathology data collection, image generation, review of the manuscript (responsible of pathology section)

Felix Lerintiu : pathology of T-ALL

Carine Gervais cytogenetics study, interpretation of data

Laurent Mauvieux, molecular biology data interpretation, generation of figures, preparation of the manuscript (responsible of the preparation of the text and generation of figures)
