Cytogenetic Heterogeneity Negatively Impacts Outcomes in Patients with Acute Myeloid Leukemia

Bruno C. Medeiros, MD

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):
“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

BCM and MO designed the research study and performed the research, MF validated the cytogenetic classifications, FRA and HPE lead clinical investigations. All authors analyzed the data. BCM and MO wrote the paper. All authors revised and approved the manuscript.
